PROJECTS

1. LIVE WEATHER APP ⚛ Deployed URL 🔗

- Live search Weather App using react functional components,React Hooks, React fetch API

2. PORTFOLIO ⚛ Deployed URL 🔗

- As a skilled React frontend developer, my portfolio showcases my expertise in creating engaging and interactive user interfaces. With a keen eye for design, efficient coding practices, and a passion for delivering seamless user experiences, my portfolio highlights my dedication to creating cutting-edge web applications

3. BAKEHUT FOOD ORDERING APP

⚛ Deployed URL 🔗

- BakeHut is a React.js-based food ordering and delivery app with four components: home, about, contact, and login pages. It has an intuitive add-to-cart feature, offline functionality, shimmer effect, live API fetching, seamless navigation via React Router DOM, Redux Toolkit for state management, and Parcel for optimized code delivery. It offers a robust and user-friendly experience.

4. TRENDSCRAFT FASHION E-COMMERCE

🛒 Deployed URL 🔗

- Trendscraft: Your ultimate fashion e-commerce app built on Shopify. Discover trendy fashion for men, women, kids, and accessories. Explore a wide variety of clothes with color selection, add them to your cart, and enjoy a seamless shopping experience. Contact us page for any queries.

5. HOTEL BOOKING WEBSITE 🅦

- In my project, I created a hotel booking website using WordPress. I utilized helpful plugins like Elementary to enhance the functionality and customized the design using Astra themes. Once completed, I deployed the website on Digital Ocean for reliable hosting and optimal performance.
