SUMMARY

I'm a motivated frontend developer eager to create user-friendly websites. In search of A position that will allow me to improve my current programming skills. From this Position, I also seek the opportunity to learn new skills for future use.
Web developer with 1 year of experience in designing and developing user interfaces, using HTML, CSS, Bootstrap, JavaScript, and React JS.

EXPERIENCE

GrowUni Technologies Pvt. Lmt . Gurugram — *Web Developer*

May 2023 – 10 June 2024

Developed and maintained web applications using the React Library. Collaborated with other developers, designers, and stakeholders to ensure the applications met business requirements and user needs.

Project – Video-Library [MERN]

1) Video library application maintained by admin user and accessed by various users.
2) User have to register and login to view videos, User can watch, like, comment and share video etc. Like this functionality provide in project.
3) Admin user is provided with credentials to add video, to remove, edit and hide details all the operations managed by admin.
4) Environment: Material UI, React Js. MongoDB, Node Js, Express Js

Project – Voting Application [Node Js]

It is a backend application for a voting system where users can vote for candidates. It provides functionalities for user authentication, candidate management, and voting.
1) User sign up and login with Aadhar Card Number and password.
2) User can view the list of candidates.
3) User can vote for a candidate (only once).
4) Admin can manage candidates (add, update, delete), Admin cannot vote.
6) Environment: Node Js, Express Js, MongoDB, JSON Web Tokens (JWT) for authentication.

Project E-Commerce Website [MERN]

1) Developed a fully-functional E-Commerce platform using the MERN stack.
2) **Dashboard:** Built a user dashboard displaying order history, personal details, and customizable user settings.
3) **User Authentication:** Implemented secure login and sign-up functionalities with JWT authentication and form validation.
4) **Admin Panel:** Created an admin interface for managing products, orders, and users, including CRUD operations and data visualization.

Project– Campaign Management

1) It lets us easily track campaigns, task progress, history, revisions, collaborated with our team Share with clients and so on- all in one place.
   Environment: React Js [Ongoing Project]
