**Database Technologies:** MongoDB, Mongoose, MySQL

**Tools:** Visual Studio Code (VSCode), AWS SQS, AWS Cloudwatch, GitHub, Postman, MongoDB Compass

## EXPERIENCE

---

### Associate Software Developer

Cedcross Technologies, Lucknow, Uttar Pradesh

(Jan 2022-May 2024)

- Developed a comprehensive user authorization system, facilitating OAuth integration for prominent online marketplaces.
- Managed API-based integration of various e-commerce platforms with multiple marketplaces, ensuring smooth data synchronization and operational efficiency.
- Utilized AWS SQS to distribute server load, ensuring optimal application performance and scalability.
- Designed and implemented a centralized payment gateway supporting Chargebee and Shopify, facilitating seamless payment processing across organizational projects.
- Modernized outdated codebases, improving functionality and aligning them with current development standards.
- Spearheaded the development of dynamic email templates, improving communication workflows and enhancing user experience.
- Used version control systems such as Git to manage source code repositories in a team environment

## PROJECT EXPERIENCE

---

### Social Ads for Buy with Prime

Backend Developer | Aug 2022 – Sep 2023

- Developed the meta upload section for product management, enabling product upload, update, and deletion.
- Designed and customized email templates for different project components, streamlining communication workflows.
- Integrated Google authorization and Enhanced Conversion Tracking API to improve security and optimize conversion rates.

### Global Payment Module

Backend Developer | Sep 2023 – Apr 2024

- Implemented features supporting various plan purchases (standard, addon, custom, enterprise) and renewal processes (monthly, quarterly, yearly).
- Designed and integrated credit consumption features for efficient usage of allocated resources.
- Developed webhook integrations for Chargebee to streamline subscription management and payment renewals.
