PROJECTS

ECOMMERCE-WEB APP (MERN STACK)

- Developed and maintained the Front-End for both Admin and User Panels.
- Implemented user authentication features including Signup, Login, and Forgot Password.
- Designed and optimized the user interface for product management functionalities (Add, Delete, Update).
- Enhanced User Panel experience with features such as Add to Cart and Payment Gateway integration.

AGAPE-ACTS Social Media WEB APP (React JS, Firebase)

- Led Front-End development for a social media app, focusing on interactive features like nominations and media uploads.
- Implemented responsive and user-friendly login, logout, and profile functionalities.
- Collaborated with the design team to receive positive feedback for the app's overall design and user engagement.
- Utilized Firebase to ensure real-time data updates for a seamless user experience.

Portal Project

- Role:
    - Front-End development for the Portal Project.
- Responsibilities:
    - User Account Management: Created and managed user accounts, ensuring seamless account operations.
    - Implemented account recovery functionalities for enhanced user support.
    - User Profile Editing: Developed and maintained user profile editing functionality for personalized user experiences.
    - Business Listings: Designed the main page for Business Listings, enhancing user navigation.
    - Created individual business pages, improving accessibility to detailed information.
    - Addition Request Process: Streamlined processes for adding businesses, real estate, and job listings. Improved efficiency in the addition request workflow.
    - Admin Collaboration: Collaborated with the admin team to implement and enhance approval workflows. Ensured seamless communication and coordination between development and admin teams.
- Project Achievements:
    - Delivered visually appealing and user-friendly interfaces for multiple projects.
    - Contributed to positive feedback for the design and user engagement of the AGAPE-ACTS Social Media WEB APP.
    - Streamlined Front-End processes for the Portal Project, resulting in improved efficiency.
