CERTIFICATIONS

Complete Responsive Web

Udemy. • July 2023 - Aug 2023

Google Analytics for beginners

Google. • Aug 2023

PROJECTS

Title: [MyndVisitX](#)

-Mynd Integrated Solution

Env: Flutter & Dart
Module: Web.

App Description: MyndVisitX is Primarily focused on Visitor Management this tool also has solved audit report generation, using this application companies no longer need to make entries offline.

Title: [MyndSpendx](#)

-Mynd Integrated Solution

Env: Flutter & Dart
Module: IOS, Android.

App Description: MyndSpendX Platform is a web and Mobile based, petty cash management solution that helps our clients with multi-site offices, branches or retail stores to manage petty cash from a centralized location.

Title: [TENTEN Delivery](#) & User App (Android)

- Vijon Infotech

Env: Flutter & Dart
Module: Android.

App Description: Working on the ordering and delivery app, I undertook the task of enhancing both its features and UI. Collaborating closely with the client, I implemented additional functionalities and made significant improvements. The revamped app was successfully deployed on the Play Store, offering an enhanced user experience and expanded capabilities.

Title: Restaurant-Owner-App (Desktop & Tablet)

- Vijon Infotech

Env: Flutter & Dart
Module: Desktop, Tablet.

App Description: In this restaurant online order software, I enhanced it by integrating an IP-based POS printer SDK and developing a desktop version. I also created custom Flutter libraries using Python. Leveraging socket APIs and method channels, I established connections between the desktop app and POS devices and printers. Strengthening my skills in hardware-software integration.

Title: [SikaBid](#) (Flutter - Android)

-AppNexus Technology

Env: Flutter & Dart
Module: IOS, Android.

App Description: Our dynamic bidding application offers users the opportunity to create, bid, and win exciting prizes. We've seamlessly integrated payment gateways and wallet options to enhance user convenience. Live bidding is an exhilarating experience with real-time timers, and our creative design adds a touch of visual elegance to the entire process.

Title: [Bazary Online](#) (Flutter - iOS & Android)

-AppNexus Technology

Env: Flutter & Dart
Module: IOS, Android.

App Description: Bazary Online is on a mission to become Iraq's leading online shopping destination, seamlessly connecting customers and suppliers. Our platform serves as a global bridge, enabling customers in Iraq to access products from five different countries: the USA, UK, Germany, Turkey, and China. With Bazary Online, we're bringing the world to our customers' fingertips.

Title: Smartit (Flutter - iOS & Android)

-Sort String Solution

Env: Flutter & Dart
Module: IOS, Android.

App Description: This exceptional project features two distinct views: one for doctors and another for patients. Within this app, doctors and patients engage in seamless communication through messaging. Doctors can send predefined questions and precautions to patients, who can respond accordingly. This innovative system enables doctors to provide tailored precautions directly to patients based on their responses.

Title: Rmlau college application (Flutter - Android)

-College Project

Env: Flutter & Dart
Module: IOS, Android.

App Description: CollegeConnect streamlines communication between students and faculty. Access schedules, lectures, and college updates for students. Faculty can manage lectures, schedules, and send alerts. It's all about efficiency and convenience.
