

ABU UBaid

Email :- auabuubaid@gmail.com

Contact No: - 8960912944

Location:- **Mumbai**

Carrier Objective: -

Results-driven and detail-oriented PHP developer with over two years of hands-on experience in designing, implementing, testing, and maintaining complex web applications. Proficient in PHP and its modern frameworks, I am dedicated to delivering high-quality, scalable, and secure solutions

Educational Qualification: -

BACHELOR OF COMPUTER SCIENCE

CSJM University, Kanpur, Sept 2019 - May 2021

Major: Information Technology

Technical Proficiency:-

- Web Technology :- HTML, CSS, JavaScript, Bootstrap, CodeIgniter
- Programming Lang :- PHP, Word Presss
- DBMS :- MySQL
- Platform :-Window 11.

Professional Experience: -

Software Developer |Superclass, Mumbai | June 2024 - Present

- Developed and maintained dynamic web applications using PHP and MySQL.
- Collaborated with cross-functional teams to analyze project requirements and implement solutions.
- Conducted database design, optimization, and troubleshooting for efficient data management.
- Participated in the full software development life cycle, including planning, coding, testing, and deployment.
- Implemented and maintained secure and scalable database structures.
- Collaborated with front-end developers to integrate user-facing elements using server-side logic.
- Resolved technical issues, debugged code, and optimized application performance.
- Stayed updated with industry trends and emerging technologies to contribute innovative ideas.

Projects:-

Junior Web Developer | Ideastack Solution Private Limited | Aug 2022 – June 2024

Front-End Development with PHP:

- Spearheaded the development of dynamic and responsive user interfaces using HTML, CSS, JavaScript, and PHP for on a admin panel and enquiry pages and login details on site.
- Launched an internal order management system using PHP and MySQL, providing a scalable and reliable solution that ensured 100% deadline compliance.
- Spearheaded the development of an in-house CRM using LAMP stack, leading to a 12% reduction in annual costs by enabling easier personalization for company use.
- Performed technical analysis to implement efficient adjustments tailored to specific company requirements.
- Collaborated closely with back-end developers to integrate server-side functionality into the front-end, ensuring seamless user experiences.
- Developed and maintained dynamic web applications using PHP and MySQL.
- Collaborated with cross-functional teams to analyze project requirements and implement solutions.
- Conducted database design, optimization, and troubleshooting for efficient data management.
- Participated in the full software development life cycle, including planning, coding, testing, and deployment.
- Implemented and maintained secure and scalable database structures.
- Collaborated with front-end developers to integrate user-facing elements using server-side logic.
- Resolved technical issues, debugged code, and optimized application performance.
- Stayed updated with industry trends and emerging technologies to contribute innovative ideas. Remember to tailor the details based on your specific experiences and achievements within the one year of PHP and MySQL development.

Internship: -

- Duration :- Feb 2022 to Aug 2022 (Internship)
- Role Played :- PHP Developer

Build a system that allows users to schedule appointments with businesses or service providers. Include features like availability calendars, reminders, and cancellations.

Remember to focus on security best practices, user experience, and scalability when working on these projects. Additionally, you may want to incorporate technologies like MySQL for database management and HTML/CSS for frontend development.

Roles and Responsibility:

- Define the project scope, objectives, and deliverables.

- Create a project plan with milestones and timelines.
- Allocate resources and coordinate team activities.
- Communicate with stakeholders to gather requirements and expectations.
- Design the overall architecture of the Appointment Scheduling System.
- Choose appropriate technologies and frameworks, such as PHP for backend, MySQL for database, and HTML/CSS for frontend.
- Define data models, relationships, and database schema.
- Ensure scalability, security, and performance of the system.
- Develop the backend logic and functionality of the system using PHP.
- Implement user authentication and authorization mechanisms.
- Integrate with a MySQL database for storing user data, appointment details, and availability.
- Design and develop the user interface using HTML, CSS, and possibly JavaScript.
- Implement a responsive design for optimal user experience across devices.
- Create forms and user interfaces for appointment scheduling, cancellations, and reminders.
- Ensure a clean and intuitive user interface.

Area of Interest: -

- Software Development

Strength: -

- A high tolerance of stress & enjoy responsibilities
- Work well in group as well as individually
- Aggressive to take challenge
- Problem solving skill

Personal Details: -

- Date of Birth :- 08/08/2000
- Gender :- Male
- Nationality :- Indian
- Material Status :- Unmarried
- Language Known :- Hindi, Urdu, English

Declaration:-

I hereby declare that above mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above mentioned particulars.
