EXPERIENCE

CODE ICONS TECHNOLOGY | AUG2022 – PRESENT

Project: Data Vistaa | Team Size: 7
Role: Data Analyst

Description: To analyze and visualize sales data to determine performance and profitability within an e-commerce platform. Aims to analyze and visualize sales data to gain insights into customer behavior, product trends, and regional performance. Transformed raw data into actionable insights, driving data-driven decision-making within the organization.

Responsibilities:
- **Data Collection and Preparation:** Collaborated with the data engineering team to access and retrieve relevant data.
- **Data Extraction:** Retrieved sales data from different data sources such as Microsoft excel files , CSV files and MS SQL Server.
- **Data Cleaning and Loading:** Cleansed and preprocessed the raw data to rectify null and missing values while ensuring accuracy and quality.
- **Interactive Reports and Dashboards:** Collaborated closely with stakeholders for reports and dashboard creation.
Created complex **Data Models** using **DAX Formulas**.
Incorporate **filters and slicers** to facilitate data exploration.
- **Analysis and Insights:** Identified sales trends, customer preferences, and regional performance through exploratory data analysis.
- **Communication and Collaboration:** Effectively communicated findings, insights and discussions with non-technical stakeholders and collaborated with cross-functional teams.
- **Documentation:** Documented data processes, sources, methodologies, and insights for future reference.
