HIGHSCHOOL
Gurudwara Inter College Chopan Sonebhadra
06/2016 - 07/2017

PERSONAL PROJECTS

PostmortemShala
- Postmortemshala is lms plateform where students get enrolled to premium courses and get live classes study material and one to one class

peace-maker (web application)
- Peace-Maker project is an online land purchase application, fully managed by Node.js technology. In that project,I implemented Stripe for the payment gateway and setup AWS S3 bucket.

forvermems (alive your memory forever)
- foreverMems website: Keeping your memories alive. I worked on the this project in frontend side using React js.

We Are The Church
- I developed The Church App, utilizing Angular for the frontend and WordPress for the backend. My role involved ensuring a seamless user experience across both aspects. A standout feature is its dual functionality, enabling users to book church-related functions and add personal churches to the platform. This allows for event organization and community engagement within the app.

Therapyai
- TherapyAI, an application designed to provide personalized health solutions. Leveraging Angular and WordPress, I crafted a seamless user experience from scratch, offering users a complimentary 30-minute trial session upon their initial visit. By integrating predefined health issues, users can easily select their concerns and receive tailored solutions, enhancing engagement and satisfaction.

Sofiaai
- Sofia AI, a user-friendly web app where people can ask questions about houses. Using Angular and WordPress, I ensured a smooth experience from start to finish. The app includes preset questions to make it easier for users to interact, saving time and boosting efficiency. This project demonstrates my skill in creating responsive and intuitive web apps tailored to meet user needs.

WORK EXPERIENCE

ASSOCIATE SOFTWARE ENGINEERING
Seek Solution LLP.
05/2022 - Present
Seek Solution is an organization working in software Development

SKILLS

HTML5	CSS3
Bootstrap	JavaScript
Mongodb	Git
