PROFESSIONAL EXPERIENCE

React Developer   2020 - 2022

Abilitec Systems Pvt. Ltd.   Hyderabad

- Developed web applications using React, Redux, NodeJS and MySQL.
- Worked closely with our team to understand and translate UI requirement into code.
- Developed single page application for displaying JSON retrieved data using React and D3 JavaScript Libraries.
- Identified web-based user interactions and developed highly-responsive user interface components via React concepts.
- Collaborated with designers to implement UI changes based on client feedback.
- Assisted with bug fixing and code reviews.

COMPANY PROJECT
BRN Educations

1. This project is developed with React JS, Node JS as a backend technology & MySQL as a database.

2. This educational management system has three categories of users: students, instructors and admins.

3. This project is simply used for tracking & managing the basic information & student's assignments.

4. When you run the project, your application starts with the home page as a login page. If you are existing user you can directly sign in else you need to sign up.

5. After sign in the user is redirected to Dashboard where he can find the respective menus in the navbar.

Role:

1. Worked as a front end junior developer.
2. My part was to co-ordinate with the front end team and develop the tasks assigned by the project lead as per client's requirement.
3. I have been parallelly working on development as well as bug fixing into this particular project.
4. Developed the Login, Signup page for this project including designing and integrating API to send data to the server and process as per the response comes.

Software Developer   2022 - Current

Buzzart Software Pvt. Ltd.   Bhopal

- Worked as a front end junior developer.
- My part was to co-ordinate with the front end team and develop the tasks assigned by the project lead as per
- client's requirement.
- I have been parallelly working on development as well as bug fixing into this particular project.

COMPANY PROJECT

Baylor Scott & White Health
- Creating a Health care portal that will allow users to view or add healthcare facilities for himself or their families. Portal provides multiple options related to healthcare like testing, medi-claims, family insurance, etc. This facility can be utilized from various tools and grouped by the vertical associated with their remediation.
- Worked closely with our team to understand and translate UI requirement into code.
- Identified web-based user interactions and developed highly-responsive user interface components via React concepts.
- Collaborated with designers to implement UI changes based on client feedback.
- Assisted with bug fixing and code reviews.

Role:

1. Fetching data from API and integrating it with the UI. Make UI compatible with different screen sizes.
2. Final verification of story before assigning it to testing team.
3. Code review of the other stories.
4. Use Figma and Zeplin screens for developing the UI and final verification.

Tools & Technologies:

. Using HTML, SCSS, .NET, Bootstrap, and JavaScript, ReactJS with React.
. developing AND consuming RESTful APIs
. Apart from that using SQL Server Management Studio (SSMS).

Alteryx

- The application UI enjoys the React library to utilize the reusable web components.
- The application is deployed using docker runtime in gitlab.
- Worked closely with our team to understand and translate UI requirement into code.

Role:

1. Converting the figma mockups into pixel perfect reusable components.
2. Following the best strategies to write and reviewing the code.
3. Moderate understanding of webpack configuration.
