PROJECTS

MyJOBee | React Native, Node, Express, MongoDB, Typescript, Android Studio   **Currently Working**
- Application is currently Live on US and INDIA (with 50 K+ downloads) markets This is a JOBPORTAL app where we are offering jobs to less educated peoples(categories like:Sweeper, Chief, Driver and many more)
- Platform which is divided in two section RECRUITERS and JOBSEEKERS for easily posting and getting the jobs.
- Worked on APIs of backend, Various screens like jobs ,myjobs,post jobs, GPS option, wallet on recruiter and jobseeker both,completed the login page ,options for choosing categories and many more.
- Rightnow trying this same for Zambia, Worked on Moengage also for making it faster. Database used is MongoDB

Access Financial | ReactJS, Java, Oracle, SQLdeveloper, Eclipse   **October 2023**
- This is Client based Live project in which we have data of those candidates who want to book space for their Grave in prior and after some months this is booked for another candidate.
- Worked and manage the Reports and Records of all these data and made various tables according to scenario with the help of React JS, worked on so many different screens.

Tic Tac Toe Game | Python, Django   **December 2022**
- Game with functionality in which players take turns putting their marks in empty squares.The first one to get 3 of her marks in the row is a winner.

Flipkart and Spotify Website | Reactjs, Nodejs, MongoDB   **June 2022**
- Worked on the flipkart, spotify websites on frontend and backend part for my practice and made cards, screens, icons
- Made the options in flipkart like 'Add to Cart','Profile Page','Whislist' etc.
