## Objective

3+ years of Experience in IT Industry with strong knowledge and experience in Tableau Desktop, Tableau Server, Tableau Online and Databases like SQL Server. Good Knowledge in Dashboard Development & Report Designing / Development Skills. I would like to cherish a position that makes effective use of my background.

## Profile Summary

- Experience in development of Reports and Dashboard in Tableau.
- Experience in full life cycle of business intelligence systems including development, deployment and reporting.
- Experience in designing and developing the reports, calculated columns, joins, filtering and administration in Tableau.
- Strong knowledge of data warehousing concepts, including star schema, snowflake schema and ETL Process.
- Experience in creating aggregates, hierarchies, charts, filters, quick filters, table calculations, trend lines calculated measures.
- Experience in Project Planning & Execution, Quality Management, Implementation & Commissioning, Operations & Maintenance and Technical Support, Monitoring Network Equipment's
- Abilities in handling the complete project operations entailing, resource utilization, and maintenance & manpower management
- Hands on experience in coordinating for the swift ramping up of projects through effective monitoring and analysis of project status
- Resourceful in managing the commissioning activities & maintenance of a wide range of telecom equipment; implementing process enhancement & quality control techniques

## Professional Experience

- GURU SOFTWARES. (Since 1 May 2020 to till date)

## Technical Skills:

**Tools:** Tableau Desktop, Tableau Server, Tableau Online

**Databases:** SQL Server, MS Excel.

## Project Profile:

### Project 1: Claim Process Analytics

Environment: **Tableau Desktop, Tableau Server.**

## Project Description

The aim of this reporting visuals is to track the performance of claims in different regions and countries, this project helps end users to understand how each claim is performing across different outcomes so that management can take effective decisions to improve the product sales and product volume of the organization. Dashboards were presenting the detail view of measurements like KPI Metrics, Stack analysis, geographical sales, comparative analysis, customer analysis, growth analysis and detail view analysis.

## Roles / Responsibilities

- Responsible for interaction with Business stakeholders gathering requirements and managing the delivery, covering the entire Tableau Development Life Cycle.
- Involved in creating and visualizing dashboards using Tableau Desktop.
- Involved in developing the reports like KPI metric Analysis, Comparative Analysis using Calculated Field, Table Calculations and LOD Calculations.
- Performed Rolling Period calculations for current year and prior year using different Date Functions.
- Developed the reports using Parameter to display Dynamic Dimensions, Dynamic Measures, Top N Results, and Dynamic Graphs etc.
- Implemented user level security to restrict the data for particular user of different region using user filters in Tableau Desktop.
- Published the reports from Tableau Desktop to Tableau Server.
- Strong administration knowledge on content management, user's management, graphs, scheduling, permissions in Tableau Server.

### Project 2: Neuro-Peripheral Product Pricing

Environment: **Tableau Desktop, Tableau Server.**

## Project Description

This project is developed on healthcare domain, which precise price measurements related to healthcare products. This project helps the end user for understanding their product Territory performance in terms of different product price comparisons through Revenue & Volume metrics, In this project we developed different visualizations reports for decision making like Price Performance Analysis, Price Comparative Analysis, Products Analysis, To Date Measure Analysis, and Detail Level Analysis.

## Roles / Responsibilities

- Understanding the functional and technical requirement analyzing Database system.
- Design, develop and implemented Tableau BI reports.
- End to End involvement in designing and developing, deploying data visualization using Tableau.
- Build Dashboards using different objects like layouts, texts, images and interactive dashboard designs with the help of action and visual best practices.
- Involved in developing worksheets using parameters, calculation- field, sets, groups, bins.
- Involved in troubleshooting of performance issue which were associated with Tableau reports.

---

- Developed the reports using different Date Calculations, LOD Expression, Set, Parameters, and Groups.
- Worked extensively with basic and advanced visualization like bar charts, trend analysis, scatter plots, highlighted tables and crosstab reports.
- Involving in Tableau administration task such as creating users, group management, content management, scheduling for reports in Tableau server.
- Prepared functional design document, requirement document and technical design document for reports.
- Involved in end to end implementation of reporting projects.

## Education

- **B.Pharm** , *Arunamai College of Pharmacy, Jalgaon in 2020 [CGPA – 5.81]*
- **HSC** from *G.T. Patil College, Nandurbar in 2014. [51.38]*
- **SSC**, *K.R. Public School Nandurbar in 2012 [63.00]*

## Personal Details

- Date of Birth : 23<sup>rd</sup> Nov 1997
- Languages Known : English, Hindi, and Marathi

I do hereby declare that the particulars of information and facts stated herein above are true, correct and complete to the best of my knowledge and belief.
