### Objective

---

Highly skilled and results-driven Software Developer with a proven track record of delivering innovative web applications and API solutions. Proficient in a range of technologies, including Node.js, Vue.js, Nuxt.js, HTML, CSS, Javascript, and Laravel, with a strong focus on building robust and scalable systems. Experienced in Python development, utilizing the Django framework to create efficient web applications following the model-view-control architecture

---

### Experience

---

- **Synch Soft Technologies pvt Ltd** Jan 2022 - Present  
SOFTWARE DEVELOPER
  - Skilled Software Developer proficient in web application and API development using Node.js.
  - Strong expertise in designing front-end websites with Vue.js, Nuxt.js, HTML, CSS, and Javascript.
  - Experienced in deploying websites on servers with meticulous database controls.
  - Developed efficient App APIs to facilitate seamless application interactions.
  - Proficient in creating Admin Panels using Laravel, empowering effective data management and system control.
  - Ensuring the Node.js server is running optimally, handling configuration, and scaling as needed.
  - In-depth knowledge of Laravel concepts like MVC architecture, Blade templating, and Eloquent ORM.
- **Agami Technologies pvt Ltd** Nov 2021 - Jan 2022  
SOFTWARE SPECIALIST
  - Proficiently contributed to the Fusion24x7 project on Linux, demonstrating expertise in Linux-based software development.
  - Actively implemented and updated application modules under the guidance of senior software developers, ensuring seamless integration and functionality.
  - Conducted rigorous testing and efficiently resolved software faults, delivering a stable and reliable product to end-users.
  - Fetching data from backend APIs, processing it, and displaying it on the user interface.
  - Building the user interface using HTML, CSS, and JavaScript frameworks like Vue.js
- **Dachrs Pvt Limited** May 2021 - Sep 2021  
Python Developer
  - Developed web applications in the Django framework, utilizing the model-view-control (MVC) architecture for scalability.
  - Designed the front end using Python, HTML, and CSS, creating visually appealing and user-friendly interfaces.
  - Implemented a secure login module for users and streamlined product registration processes.
  - Worked on data science analytics

---

### Skills

---

- Node js
- Type Script
- Laravel
- MySQL
- Vue js
- Nginx
- Git and GitHub
- Python

- Django

---

## Projects

---

- **Mandara Consumers and Retailers Web App**
  - Developed APIs for a retail web application facilitating redemption of promotional schemes by consumers.
  - Implemented functionalities for both retailer and consumer interfaces.
  - Built an Admin Portal for scheme management, reporting, and data download.
- **Merchandise Api and Admin panel**
  - Designed and developed a comprehensive Admin Panel for a merchandise project, enabling:
    - Promoter activity tracking (login/logout times, store conversions)
    - Downloadable reports on promoter and supervisor performance
    - Multi-level access control (Admin & Project In-charge with segregated roles)
    - Admin-controlled project in-charge creation
  - Developed APIs for the mobile app, facilitating:
    - In-app activity tracking (check-in, checkout, store creation)
- **Fureternity App and Admin**
  - Developed robust backend APIs for a gaming application, facilitating seamless user interaction and data management.
  - Designed and implemented a comprehensive Admin Panel for the game, enabling efficient monitoring and management functionalities.

---

## Achievements & Awards

---

- Ranked 3rd in A.P.J. Abdul kalam startup parikarma edition 29

---

## Education
