Summary

As a dedicated and skilled Fullstack Developer with 2.5 years of experience, I bring expertise in the MERN stack (MongoDB, Express.js, React, Node.js) along with proficiency in Next.js and TypeScript. With a passion for creating scalable, user-centric applications, I excel in developing robust backend APIs, dynamic frontend interfaces, and seamless integrations. My experience includes building end-to-end solutions, collaborating with cross-functional teams, and optimizing performance to deliver high-quality, efficient software. I am committed to solving complex problems, driving innovation, and contributing to impactful projects with a focus on excellence and agility.

Skills

Programming: JavaScript (ES 6+), Type Script, HTML, CSS, Java

Frontend: React.js, Next.js

Backend: Node.js, Spring Boot

Database: MongoDB, MySQL

Other Skills: Full-Stack Development, Problem-Solving, Team Leadership

Education

Bharat Institute of Engineering And Technology, Hyderabad	Jun 2018 – May 2022
Narayana Junior college, Hyderabad, Hyderabad	July 2016 – May 2018
New Victory Talent School, Khammam	Jun 2015 – May 2016

Experience

Frontend Developer, Prayoga Services Oct 2022 - Present

Project: Pudami Stores

- Developed reusable components using React.js, streamlining the development process and maintaining consistency across projects.
- Leveraged Redux for efficient state management of cart, wishlist, and order tracking.
- Collaborated with cross-functional teams to deliver projects on time and within budget, ensuring high-quality deliverables.
- Implemented responsive design principles, ensuring compatibility across devices and improving mobile user experience.
- Deployed web applications to cloud platforms like AWS and Heroku, enabling scalability and reliability.
- Conducted code reviews and optimized workflows, reducing development time by 15
- Led version control processes with Git, improving collaboration and reducing integration issues.
- Developed a dynamic product search and filter functionality, enhancing the shopping experience for users.

Projects

Product Booking Platform (React.js, Node.js)

- Created a responsive booking platform with React.js, Node.js, and API integrations,
- Leading to a 25
- Implemented seamless UI/UX design, improving user navigation and reducing the booking time by 30
- Integrated third-party payment gateways and real-time data sync for enhanced transaction security and performance.
