PROJECTS

SUDOKU ⧉
This is a webpage where users can play sudoku. ReactJS is used in the frontend, nodeJS is used for the backend, hapiJS is used for making API's and mongoDB is used for database.

CryptoYard ⧉
This is an application where you can track all the cryptocurrencies in real-time. ReactJs is used in making this app. API is imported from coingeeko. I have added all functionalities to make it interactive and user-friendly.

CERTIFICATES

- AWS Machine Learning Foundations (Udacity) ⧉
- Javascript Programming- From scratch to advanced (Udemy)

CAREER OBJECTIVE

To secure a challenging position in your organization that could help me learn new skills and deliver my potential
