PERSONAL PROJECTS

iNotebook   iNotebook   Frontend   Backend

- iNotebook is a MERN stack app which is made using MongoDB , Express, React, and Node JS.
- The backend of this app consists of various CRUD operations and in this app you can add, update and delete notes.
- The notes are linked to each users id and no one else can access them without logging in to their respective accounts.
- The notes are saved in the database of every user and you can access them later from anywhere. The user password is encrypted with Bcrypt.js and with salt and json-web-token is used for authentication.

Text Utils   Text-Utils   GitHub

- Text -Utils is a Text Based utility app created in React where you can perform different operations with your text.
- Uses Speech Synthesis Web API from which you can paste any text and listen to it in your browser by using this app.

Racoon Express   Racoon-Express   GitHub

- Racoon Express is a News app created in React that gets you your daily dose of News.
- Uses NEWS API that fetches you latest news and you can surf through your favorite category of News and get all the top headlines of that category.

EXTRA-CURRICULAR ACTIVITIES

NCC (Army Wing)   (Served for 3 Years)

- Attended many State & National level Camps like Basic And Advanced Leadership Camps and other camps.
- Attained C Certificate with A grade.
- Won 1st Prize in cultural competition at Inter Group Competition
- Did Volunteer Work during Covid-19 Pandemic in NCC Yogdan Scheme and got Corona Warrior certificate from Deputy Commissioner of my state.
