PROJECTS

BluMaiden

Development Ensemble - React Js, Node Js, MongoDB, Auth0

- Developed an application that allow users to consultations with renowned doctors and health coach using the app.
- Pregnant women benefit from having their own Health coach who can provide guidance on maintaining health during pregnancy.
- Created Admin webapp to contorl all over the system on user app, health coach app as well as doctor app.
- Worked on UI with Web and iPad responsive, Integration of API's, Worked on Auth0.

Lottery of the people

Development Ensemble - ReactJs, NodeJs, MongoDB, Blockchain

- Lottery of the People is a distributed system which allows anyone to create, distribute, buy or sell digital NFT lottery tickets.
- The creator can develop a game, sponsors can support it, and users can purchase tickets to participate and potentially win prizes.
- To engage in transactions, we must link our wallet to platforms such as Metamask and Coinbase. With USD and Matic, we can execute all transactions seamlessly.
- Created User webapp and Admin webapp UI with Web and iPad responsive, Integration of API's, Integration of smart contract.

Fanblock

Development Ensemble - React Js, Graph QL, ScyllaDB, Auth0

- It's Football project using it fan can experience a fresh and thrilling game concept. As the ultimate fan, you have the opportunity to own segments of your favorite team's field, bringing you closer to your club and fellow supporters.
- Using this user can buy packs and based on the block of your team's field, accumulate points, and gain access to weekly giveaways and monthly prizes.
- This app lets you watch live match feeds and keeps you updated on every moment. After the match, you can review all the data and check the leaderboard to see who's on top.
- Worked on UI, Integration of API's, Integrated Auth0 for Sign in using OTP, Sign in using social method like Google, Integrated the OPTA data.
- Created User webapp and Admin webapp.

Dataset

Development Ensemble - React Js, Node Js, MongoDB, Auth0

- This project serves as a platform for exchanging data, allowing users to share their information in exchange for various offers and benefits. By providing consent, users can access a range of incentives, such as discounts, rewards, or exclusive deals.
- A website integrates an SDK, enabling users to provide their consent. Based on this consent, businesses can reward users accordingly.
- Users have the option to manage their consent by accessing either the extension or the user web application. From there, they can control and adjust their consent preferences.
- Worked on UI, Integration of API's, Integrated Auth0 for Sign up, Sign in and verification mail.
