EXPERIENCE

Developer Associate

Inspiring Wave ↗

Present

As a MERN developer for a Template design and PBT Classes websites, I played a crucial role in building the website's architecture and functionality. My responsibilities spanned from creating RESTful APIs with Node.js and Express.js to developing dynamic and responsive user interfaces using React.js. I integrated MongoDB for efficient data management and ensured adherence to coding best practices for a robust codebase. My role aimed at delivering a visually appealing and user-friendly website through collaboration with designers and meticulous attention to detail.

As a MERN developer for a template design website, I utilized a range of tools and technologies:

- **Development Stack:** Employed the MERN stack (MongoDB, Express.js, React.js, Node.js) for full-stack development.
- **Frontend Framework:** Implemented Next.js for server-side rendering, improving website performance and SEO.
- **Authentication:** Implemented JWT tokens for secure user authentication and authorization.
- **Data Visualization:** Incorporated Apex Charts to create interactive and engaging visualizations.
- **Routing:** Employed React Router DOM for efficient client-side navigation within the React application.
- **State Management:** Used Redux or the React Context API for efficient state management, depending on project requirements.
- **Axios:** Employed Axios for making HTTP requests from the client-side to the server. Axios facilitated seamless communication, allowing the frontend to interact with the backend and retrieve or send data.
- **Tailwind CSS:** Utilized Tailwind CSS for efficient styling and UI development. Tailwind's utility-first approach enabled rapid styling and customization, contributing to a responsive and visually appealing user interface.
- **HTTP Requests:** Leveraged Axios for making HTTP requests from the client-side to the server.
- **Version Control:** Utilized Git and GitHub for collaborative version control and code repository management.
- **Code Quality:** Enforced code quality standards using ESLint and Prettier for consistent and error-free code.
- **Package Management:** Managed project dependencies with NPM (Node Package Manager)
- **Project Management:** Utilized Jira for organized task tracking and collaboration within the development team.
- These tools collectively contributed to a streamlined

SUMMARY

Experienced MERN stack developer with 1.3 years, expertise in MongoDB, Express.js, React.js, JavaScript, HTML, CSS, Tailwind, Bootstrap, Node.js, Redux, Context API and web development. Skilled in full-stack development, UI design, RESTful APIs, and security protocols. Passionate about learning, collaborating, and delivering high-quality solutions. Seeking opportunities to contribute to innovative projects and grow professionally in a dynamic team environment.

SKILLS

Redux/Context	Advanced
ReactJS	Advanced
JavaScript/ES6/ES7	Advanced
NextJS	Intermediate
TypeScript	Intermediate
C language	Intermediate
Multer	Intermediate
Mongoose	Intermediate
ExpressJS	Intermediate
NodeJS	Intermediate
MongoDB	Intermediate
Bootstrap	Advanced
MUI	Advanced
Tailwind	Advanced
HTML5, CSS3	Advanced
Axios	Advanced

CERTIFICATES

Full Stack Web Development ↗

Naresh IT Institute Hyderabad

A full stack web development certification program equips individuals with the skills and

knowledge necessary to build both front-end and back-end components of web applications.

Overall, a full stack web development certification program provides individuals with a

comprehensive skill set to develop modern web applications from start to finish, making them

competitive in the rapidly evolving field of web development.
