Experience

March 2024 - Present
Augurs Technologies Pvt. Ltd | Full Time
Software Developer
Technologies:- Node.js with Express Framework, MongoDB, HTML, CSS, JavaScript.
At Augurs Technologies Pvt. Ltd., a dynamic and innovative technology company pioneering cutting-edge solutions, I am thrilled to be part of a forward-thinking team. I look forward to leveraging my skills and expertise to advance technology and deliver impactful solutions for our clients.

December 2022 - February 2024
Softfix Technologies OPC Pvt. Ltd | Full Time
Node.js Developer
Technologies:- Node.js with Express Framework, MongoDB, HTML, CSS, JavaScript.
I work as a Node.js Developer at Softfix Technologies OPC Pvt. Ltd., specializing in both front-end and back-end development. Previously, I utilized the Laravel framework for web development. Over time, I transitioned to Node.js with Express and MongoDB, where I now lead projects and collaborate with cross-functional teams to deliver robust solutions.

December 2021 - December 2022
Webflair | Full Time
Jr Software Developer
Technologies:- Node.js with Express Framework, MongoDB, HTML, CSS, JavaScript.
As a Web Developer Intern at Webflair, I engaged in hands-on experience within a dynamic development environment, gaining valuable insights into web technologies, best practices, and project collaboration. My internship was marked by a proactive approach to learning and contributing to various stages of web development.

Certificates

- Certificate of 6 months internship in Laravel & CI.
- Certificate in Core Java from BTPS, Kanpur.
- Certificate of 3 months internship in WordPress.

Hobbies & Interests

- Learning new things.

- Reading.

Projects

Real - Estate

Project Name : My Property Dr

Role and Responsibilities:- As the sole architect and developer behind My Property Dr, I led development of a robust web application, focusing on backend technologies. My responsibilities included conceptualizing, designing, and implementing the entire project using Node.js with Express and MongoDB. I integrated rich functionalities and features, ensuring seamless data management and efficient backend operations.

IMS-Projects

Project Name : BDSPM

Role and Responsibilities:- In my role as a Freelance Web Developer, I took on a multifaceted role in developing BDSPM (Institute Management System), focusing on backend technologies. I meticulously designed and integrated various modules such as student admission, invoice generation, section management, bulk SMS dispatch, and payment history maintenance using Node.js with Express and MongoDB. This approach ensured seamless data handling, efficient API integrations, and enhanced backend functionality for a comprehensive and dynamic web application.

Management System

Project Name : NHK

Role and Responsibilities:- During my tenure at Softfix Technologies OPC Pvt. Ltd, I played a pivotal role in the development and management of an intricate web application focusing on backend technologies. This included rental order management, sale order processing, and integration of the Razorpay Payment gateway. I also managed pharmacy project logistics and comprehensive stock management. Leveraging Node.js with Express and MongoDB, I ensured seamless data handling and efficient API integrations, optimizing performance and enhancing overall user experience.

SkinOCare

Project Name : SkinOCare

Role and Responsibilities:- I played a major role in setting up the entire backend and database for the Skinocare project during my tenure at Softfix Technologies OPC Pvt. Ltd. The project was developed using Node.js with the Express.js framework and MongoDB database.
