Experience

Dec 2021 to June 2023 : UJR Corporate Solutions Private Limited.
Project : E-commerce
Environment : VS Code
Front-end : HTML, CSS, JavaScript, Material-UI, React.Js, Redux
Back-end : Node.JS, Express.JS
Team Size : 5

Description:

It is completely fully fetched E-Commerce web application, having the two main modules, ADMIN module and USER module. Inside user module it has a multiple sub modules like payment, images, cart, status, business work etc. and in admin module it has a sub modules like category, brand, product, business status etc. The technologies we are using to develop are jQuery for Client side script, Node.js for server side to develop the APIs for database operations and MongoDB for database.

Responsibilities:

- Built Admin and User module in E-commerce.
- Developed dynamic responsive Web Application based on the UX by integrating React JS with Material UI.
- worked on the forms with validation.
- Worked on API integrations.
- Developed multiple modules like- Login, Registration, Product Details, Navigation, Footer.
- Developed Single Page application using React, Redux and Implemented reusable

components using React JS which are used in multiple modules.

- Used forms, table, grid, events, highcharts, validation, routing and implemented 3rd party module in the application.
