## EDUCATION

### MCA

Institute of Engineering and Technology, Lucknow

10/2021 - 06/2023

### BSC

Shri Ram College, Muzaffarnagar

07/2017 - 10/2020

## PERSONAL PROJECTS

### You Tube Clone

- Developed a feature-rich YouTube Clone web application using the MERN (MongoDB, Express, React, Node.js) stack.
- Implemented user-friendly features, including video playback, user comments, and channel subscriptions, closely resembling the functionality of the real YouTube platform.
- Leveraged Firebase for real-time video storage and streaming, ensuring seamless video playback and content management.

### Dance Academy Website

- It is a simple project developed using Node.js, MongoDB, JavaScript, CSS, and HTML.
- User can go to Dance Academy website and all the details will be available there about the academy.
- User can contact us with a form that contains his information and his concern.

### Login Signup Page

- It is a simple project developed using Node.js, HTML, CSS and MongoDB.
- User can sign up himself by entering the required information. One email can be registered one time.
- User can login by entering the correct email and password.

### Virtual Assistant

- This virtual assistant project was developed using Python.
- It can perform several tasks such as send email, text, play music, tell directions and jokes, tell news, etc.

## EXPERIENCE

### Web Development Internship

CodeClause

07/2023 - 08/2023

#### Achievements/Tasks

- Worked on a variety of web development projects using the MERN (MongoDB, Express, React, Node.js) stack.
- Gained hands-on experience in database management with both MongoDB and Firebase, ensuring efficient data storage and retrieval. Collaborated closely with a talented team of developers, enhancing problem-solving and teamwork skills.
- Contributed to the creation of a YouTube Clone, implementing functionalities such as video playback, comments, and user subscriptions using technologies like ReactJS, MongoDB, and Firebase.
