PROFESSIONAL SUMMARY

Implemented RESTful APIs with Node.js and Express.js to manage user data, workout entries, and progress tracking. Proficient in front-end and back-end development, with expertise in HTML5/CSS3/JavaScript, and React.js. Skilled in using Node.js, Express.js, and MongoDB for full-stack development. Experienced in integrating APIs, optimizing site and ensuring cross-browser compatibility. Passionate about creating clean,

MERN STACK DEVELOPER

- Developed and maintained scalable web applications using MongoDB, Express.js, React.js & Node.js
- Integrated third-party APIs to enhance application functionality.
- Optimized database queries and server-side logic for improved performance.

EDUCATION

DIPLOMA IN INFORMATION TECHNOLOGY

MMIT Sant kabir Nagar (U.P) 2021-2024

INTERMEDIATE (PCM)

R.K.Y.I.C Bhikhampur Road Deorai(U.P) 2020-2021

HIGH SCHOOL

R.K.Y.I.C Bhikhampur Road Deorai(U.P) 2017-2018

SKILL

- Programming Languages :** HTML/CSS JavaScript 2024-NOV
- Frameworks :** React.js , Next.js , Bootstrap
- Backend :** Node.js , Express.js
- Databases :** MongoDB, Mysql , Postgresql
- Tools & Platforms :** Git , Github , Postman
- Additional Skills :** Rest APIs , Responsive Design
- Soft Skills :** Teamwork, Communication, Problem Solving

PROJECTS

FT Fitness 2025

- Developed a full-stack fitness web application that allows users to track their workouts, manage their fitness goals, and monitor progress.
- Designed and implemented a user authentication system using JWT for secure login and registration.
- Integrated MongoDB for storing user data, workout logs, and fitness plans.
- Implemented RESTful APIs with Node.js and Express.js to manage user data, workout entries, and progress tracking.

Hospital Management

- Developed a comprehensive Hospital Management System to streamline hospital operations, including patient registration, appointment scheduling, and billing management. 2025
- Built a user-friendly interface with React.js, allowing patients and hospital staff to interact seamlessly with the system.
- Implemented JWT (JSON Web Tokens) for secure user authentication and role-based access (e.g., admin, doctor, patient).
