EDUCATION

Kanpur, India	**UIET (Kanpur university)**	**Aug 2016 – Mar 2021**
Bachelor of Technology	Information and Technology	

EXPERIENCE

Application Developer (Core Frontend), Black Box   **March 2022 - Present**

- Worked as frontend developer in the **core and product engineering team** of the company to deliver demand and customer product for the end-user
- Developed a common form component, using **react-hook-form**, which can be used anywhere for lay-outing, reducing repetition of code.
- Led a 5-member team in creating a **lender application dashboard (Avaya Workspace)**, facilitating seamless communication between Agents and users on a single platform. **(Work as a Backend also)**
- Revamped Flair application, removing dead code, which led to reduced build times and enhanced page performance. Especially **state-management** concept is used in this project i.e. redux concept.
- Development of **Centralized Core UI, helpers, and reusable NPM library** for various projects at Black Box which resulted in better development.
- **Improvement of build process** (build speed by around **20-30%**) and standardization of code structure and quality. Providing right and better paths to new joiners as to how to approach frontend development
- Made in-house utils, removing external utility libraries like lodash, and performed Cypress testing for the same.
- Developed a **Vendor CRM** to onboard and analyze the Overhead costs of the organization.
- Worked with the Quality Assurance and UAT team to help design the Automation testing Platform using Cypress.
- **Tech:** React JS | React-redux | Javascript | Express JS

Frontend Intern, Now Or Never   **November 2021 - Jan 2022**

- Developed a Blog Application where anyone can publish a blog in private or public mode.
- Anyone can give a comment on a blog or comment on comment (reply). Also, can give votes to blogs or comments.
- Ensured responsiveness, multiple browser compatibility.
- **Tech**: React Js | Javascript

ACHIEVEMENTS

- **Solved 300+ programming problems:** Leetcode, InterviewBit and HackerRank.
- Ranked **among top 10%** (All India) out of 1,00,000+ participants in first round of **Codevita 2021** and qualified for the next round.

SKILLS

- **Strong Areas**: JavaScript, React Js, React-Redux
- **Frameworks**: Cypress, Postman
- **Areas of Interest:** C++, NodeJS, ExpressJS, REST APIs
