PHP (6 years of project experience) | JavaScript (4) | Laravel (6) | MySQL (6) | MariaDB (6) | Vue.js (3) | BootstrapVue (2) | Nuxt.js (2) | Quasar (2) | Vuetify (1) | Jquery (2) | Ajax (2) | AWS (EC2, RDS, CloudWatch, IAM) (2) | Docker (1) | Git (4) | PHP Unit (2) | CI/CD (1) | TDD (1) | Redis (1) | HTML (5) | CSS (5) | Bootstrap (4) | Microservices (3) | Design Patterns (3) | Jira (2) | Laravel Vapor (1) | Laravel Pest (2) | Tinkerwell (1) | Rest API (4) | CodeIgniter (2) | PHPFox (1) | Websockets (1) | Vuex (1) | Scrum/Agile (6).

WORK EXPERIENCE

03/2022 – today

Full Stack Developer
DigitalTolk, Stockholm, Sweden (remote)
Project: Talentemp - Swedish startup offering a booking platform where you can book talents according to your needs (e.g Doctor, Teacher, Chef).
- Working in an agile team of 15 improving and developing new features in Microservices architecture (10+ Microservices).
- Built several features from scratch which shows the leaves of all the talents in a calendar view and exports them into an excel file using Laravel and Nuxtjs.
- Integrated 3rd party social media platform using PHPFox with customized features as a Microservice. Implemented Websockets and converted all the notifications to real-time notifications.
- Added auto-assign feature and optimized the booking-assigning algorithm which increased the booking completion rate by 30% and contributed to the company winning two best service awards.
- Deploying the project CI/CD using GitLab and debugging and logging using CloudWatch AWS.

Technologies used: Laravel | PHP | Vue.js | Nuxtjs | MySQL | PHPUnit | Laravel Pest | Microservices | Docker | AWS | PHPFox | Git | CI/CD.

06/2021 – 03/2022
