Projects

- Communag
    - It is an online portal for all communities and manages their community members data like Personal, Business & Matrimonial. So other members can easily connect with each other, the Admin can Define their Roles & Permissions, make Community Users and Members Accept & Reject, Send Invitations for community Joining, and add Event and Festival details for Community Members.
    - This application is developed in PHP 8.1, Laravel 8.*, Bootstrap, jQuery, Git, Livewire.

- MLM Projects

- o Network marketing is known by a variety of names, including multi level marketing (MLM), cellular marketing, affiliate marketing, consumer-direct marketing, referral marketing, or home-based business franchising. Companies that follow the network marketing model often create tiers of salespeople—that is, salespeople are encouraged to recruit their own networks of salespeople. The creators of a new tier (or "upline") earn commission on their own sales and on sales made by the people in the tier they created (the "downline"). In time, a new tier can sprout yet another tier, which contributes more commission to the person.
- o This application is developed in PHP 5.6 to 8, Laravel 5.6 to 8.x, HTML, Bootstrap, jQuery, Git.
- o In this application, we are using Laravel Queue, Jobs, Supervisor & Laravel Vapor.

- CEDR
  - o It is an application that helps customers to adjudicate their legal issues through legal advisors and/or companies and get appropriate resolutions to solve their matters.

- Gujarat Food
  - o Gujarat Food is an E-Commerce web application. where customers can buy all edible products directly through this platform and get it delivered to their doorsteps. This application is developed in PHP7, Laravel 5.4, Bootstrap, jQuery, Git, and LAMP stack.

- Best Property Deal
  - o It is an online sell, buy, or rent property application where different agents and owners can register themselves and use this platform to sell, buy or rent property from different locations. This application developed in PHP7, Laravel 5.4, Bootstrap, jQuery, Git, and LAMP stack.

- Peak Junction
  - o It is an online portal that contains lead campaigns with its 30mile radius zip code coverage and its top bid used to reach affiliates using lead offers, Admin can import a campaign and it's zip code, system has 1572 campaigns and around 10,000 zip codes with it's 30 mile radius zip codes. This application is developed in PHP 7.2, Laravel 5.6, Bootstrap, jQuery, Git.

- VCMS Bus Station System
  - o It is an online portal for Manage the Buses in the bus station.
  - o We can also see the live view of that Bus Station, so we can see which buses are parked in the parking lot and which buses are standing at different gates.
  - o This application is developed in PHP 7.4, Laravel 7.0, Bootstrap, jQuery, Git.
