Highly motivated IT professional with in-depth knowledge in front-end and back-end development, as well as software development, currently pursuing an internship as a Front-end Developer, targeting challenging positions in the IT industry, targeting roles in front-end development, back-end development, and software development to leverage skills and contribute to organizational success

<https://github.com/Bhawishya509>

## KNOWLEDGE PURVIEW

- Front-end Development
- Back-end Development
- Software Development
- Programming Languages Proficiency
- Web Development Expertise
- UI/UX Design Principles
- Version Control Systems
- Troubleshooting and Debugging Techniques
- Testing and Quality Assurance
- Data Structure and Algorithm Knowledge

## TECHNICAL SKILLS

- ReactJS and Redux-tool-kits
- TypeScript and VueJS
- NextJS and Node.js
- Express.js and MongoDB
- Mongoose and SQL
- Git and GitHub
- REST API Development

## SOFT SKILLS

- Collaboration & Communication
- Analytical Approach
- Time Management
- Leadership
- Innovative
- Critical Thinker
- Problem Solver

## CODING PROFILES

## PERSONAL DETAILS

DOB : 27<sup>th</sup> Sept'2001  
Address : Noida, Uttar Pradesh  
Languages Known : English & Hindi

## PROFILE SUMMARY

- Currently working as an Intern at Accio Job, gaining valuable hands-on experience in front-end development using ReactJS and collaborating with cross-functional teams
- Strong skills and competencies in programming languages, web development, front-end technologies, UI/UX design, version control, troubleshooting and debugging, testing and quality assurance, and data structure and algorithms
- Achieved a significant accomplishment in the current role by implementing new features, such as Google Auth login, and enhancing the design of web applications, resulting in improved user experience

## EDUCATION

- **2023** M.C.A, Greater Noida Institute of Technology (GNIoT), Greater Noida, India
- **2022** B.C.A, Jawaharlal Nehru College (VKSU), Dehri on Sone, India
- **2019** 12<sup>th</sup>, Jag Jiwan Mahavidyalaya, Dehri on Sone, India
- **2016** 10<sup>th</sup>, BI Indo, Aurangabad

## INTERNSHIP

**Accio Job | Gurugram, Haryana** Jun'23- Present

### Front end Dev

#### Key Result Areas:

- Collaborating with the development team to conceptualize, create, and implement new features for web applications, ensuring seamless integration and enhanced user experience
- Conducting thorough testing and debugging processes to guarantee the functionality, performance, and reliability of the applications, resulting in improved customer satisfaction
- Assist in troubleshooting and resolving technical issues, providing timely and effective solutions to maintain smooth operations and minimize downtime
- Actively participate in code reviews, offering constructive feedback for improvements, and ensuring adherence to best practices and coding standards
- Work closely with UI/UX designers to ensure a seamless user experience, incorporating user feedback and industry trends to optimize application design and functionality

#### Achievements

- Successfully implemented features such as Google Auth login and improved the design of web applications, resulting in increased user engagement and satisfaction
- Showcased expertise in problem-solving by solving over problems in MERN stack and data structure and algorithms, showcasing adaptability and technical proficiency

## PROJECTS

**E-Commerce Website** [https://github.com/Bhawishya509/frotend\\_ecom](https://github.com/Bhawishya509/frotend_ecom)

- Developed a fully functional e-commerce website with user authentication, cart functionality, and secure payment integration using ReactJS, React Redux Toolkit, Node.js, Express.js, MongoDB, Mongoose, MUI, and Bootstrap
- Implemented authentication measures using middleware and client-side validation, users are prompted with warnings if they attempt to sign up without filling in all required fields, passwords must meet specific criteria, including the inclusion of capital and lowercase characters, numbers, and special characters, similar validation is applied during the login process. Users cannot add items to the cart without logging in
- Utilized a range of technologies including ReactJS, React Toolkit, React-toastify, React SweetAlert, React-router-dom, Node.js, Express.js, MVC model, MongoDB, Mongoose, Material-UI, and Bootstrap

**Facebook Clone** <https://github.com/Bhawishya509/facebookclone12>

- Created a Facebook clone with features like chat, login/logout functionality, and password visibility toggle, employing technologies like ReactJS, React Router, CSS, and DSA logic
- Utilized technologies such as ReactJS and React-router-dom to create the application, design implemented using CSS, ensured a visually appealing and responsive user interface
- Incorporated data fetching and manipulation logic, including the use of DSA (Data Structure and Algorithms) principles, to enable seamless retrieval and display of relevant information

**Pet App** <https://github.com/Bhawishya509/food-app>

- Built a comprehensive pet app with product listings, including images, descriptions, and prices, and implemented push notifications for updates, using technologies such as ReactJS, React Redux Toolkit, Auth, and CSS
- Utilized technologies such as ReactJS, React Toolkits, authentication, and CSS to create a visually appealing and user-friendly app

**Personal Portfolio Website** <https://github.com/Bhawishya509/Plotfolio>

- Developed a visually appealing personal portfolio website with an About Me section, skills showcase, and contact information, leveraging technologies like HTML, CSS, JavaScript, ReactJS, Bootstrap, and Material UI
- Employed technologies such as HTML, Advanced CSS, JavaScript, ReactJS, and frameworks like Bootstrap and Material UI to design and develop the website
