EXPERIENCE

Software Engineer
Pristyn care

📅 Apr 2022 – Now 📍 Gurugram, HR

- Experienced professional adept in developing and implementing data-driven strategies for healthcare initiatives. Proficient in executing innovative projects such as implementing WhatsApp bots for post-operative and in-patient care, resulting in a 40 percent reduction in PX Team efforts and a 50 percent improvement in patient response time.
- Skilled in overseeing projects such as 'Dynamic SR Number Allocation' utilizing a tech stack inclusive of Java, **Nodejs**, **MongoDB**, **Redis**,**ReactJs** and **Express**. Additionally, contributed to the 'EMI Dashboard' project, aimed at providing patients with surgery-specific EMIs at lower interest rates. Possesses expertise in EC2 and **NGINX** optimization, ensuring efficient deployment and performance enhancement.
- Experienced in leveraging **DynamoDB** streams to enable real-time data consumption and perform seamless update operations. Proficient in harnessing this technology to ensure timely and accurate updates, enhancing the efficiency and responsiveness of data-driven processes. Skilled in implementing and managing real-time data streams for effective and dynamic system operations.
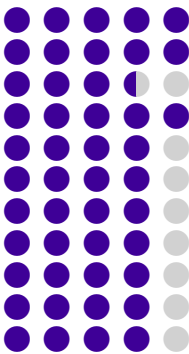

Trainee
Vmoksha Technologies Pvt. Ltd

📅 Nov 2021 – Apr 2022 📍 Bangalore, KA

- Proficient in developing comprehensive HR management solutions, including an On-Boarding and Off-Boarding web application designed to streamline HR processes for new employee integration and departures. Utilized Node.js, SQL, EJS, and Express to build robust functionalities facilitating efficient management of the onboarding and offboarding procedures. Experienced in crafting user-friendly interfaces and implementing database-driven solutions to enhance HR operations.
