Pooja More
MERN Stack Developer

✉ **poojamore21112000@gmail.com |** ☎ **91 7401431515|** ⚲ **Pune, Maharashtra**

PROFILE

- Experienced ReactJS Developer with **2+ years** of hands-on experience, specializing in building dynamic and responsive web applications.
- Proficient in utilizing **React.js** and related technologies to develop user-friendly interfaces and optimize frontend performance.
- Proficient in implementing solutions leveraging **React.js** and related libraries, including **state management, form validation** and **dynamic components** to optimize user interactions and streamline application workflows.
- Skilled in cross-functional teams to deliver solutions that meet client requirements and industry standards.
- Experience working with Agile Methodologies and Waterfall model.

TECHNICAL SKILLS

- **Web Technologies :** React.js, JavaScript(ES6), Material UI, HTML, CSS, Node.js, Express.js

- **Skills & Services :** Hooks, Redux, Context API, RESTful API, NPM, JWT

- **Database:** MongoDB, MYSQL.

- **State Management**: Context Api, Redux

- **Development tools:** Visual Studio Code, Postman, Figma, VS Code (Run & Debug)

- **Version Control:** Git, GitHub

- **Methodologies:** Agile, Scrum using tools like Jira

PROFESSIONAL EXPERIENCE:

VITTECH Pvt. Ltd.   (**Mar 2022 – Present**)
ReactJS Developer

PROJECTS

1. CRM Development For Education Institutions.   **Aug 2023 - Present**

Roles and Responsibilities:

- Worked closely with the client for requirements gathering and product reviews and Performed project design using **Figma** and development activities according to client specifications.
- Created comprehensive **As-Is** documents outlining the current state of systems and processes, including functionalities, workflows, and constraints, to facilitate analysis and identify areas for optimization.
- Defined new validations through **ReactJS** with **JavaScript** for the form field validation implemented through **MaterialUI**.
- Developed APIs using **ExpressJS** and **NodeJS** and successfully tested them using **PostMan API** Platform.
- Integrated **Node Mailer** for sending emails and **Multer** for handling file uploads, enhancing the application's functionality.
- Implemented **React Hook** Form for efficient form management and handling in the frontend.
- Integrated **Razorpay** for secure online payment processing, ensuring a seamless payment experience for users.
- Utilized React PDF for generating PDF documents dynamically, meeting various document generation needs within the application.
- Implemented **JWT (JSON Web Tokens)** for secure authentication and authorization, ensuring data integrity and user privacy.
- Utilized **MongoDB**, a **NoSQL** database, to store user information successful connections were made with APIs using the **mongoose** module.
- Utilized **JIRA**, For Progress Tracking, Bug Tracking and Project related progress.
- Followed **Agile** Methodology throughout Project.

2. Event Organizing Application   **Aug 2022 -April 2023**

Roles and Responsibilities:

- Designed and implemented the user interface of the event management tool using **React.js** and **TypeScript**, ensuring a balance between functionality and aesthetics based on user requirements.
- Developed responsive features using **React.js and CSS** to enhance user experience, ensuring the web design is fully optimized for smartphones and other mobile devices.
- Utilized HTML, CSS, and TypeScript to create user-friendly and accessible web pages, providing a seamless experience for event organizers and attendees.
- Built and maintained a robust front-end architecture using **React.js** and **JavaScript**, ensuring accurate implementation of user interface concepts and interactions.
- Designed and implemented **RESTful API** endpoints with **Node.js, Express.js** and **JavaScript** based on frontend requirements, supporting the functional and aesthetic needs of the user interface.
- Developed backend features and services that enhance the overall user experience, ensuring efficient data flow and real-time updates to support mobile optimization.
- Used **JavaScript** to develop and maintain scalable, user-friendly web services and backend logic for the event management tool.
- Implemented backend services and middleware using **Express.js** to support accurate and efficient user interface concepts and operations
- Reviewed and analyzed application requirements and **API designs** to ensure smooth integration and compatibility with existing applications and services.
- Collaborated on the overall structure and design of the event management tool's web pages, balancing functional requirements and aesthetic designs using **React.js, Node.js**.
- Conducted through reviews of application requirements and interface designs to ensure compatibility and seamless integration with existing systems and applications.
- Designed and documented RESTful APIs using Postman, Node.js, Express.js ensuring they meet the functional requirements of the frontend.
- Reviewed and validated application requirements and API designs with Postman to ensure they are compatible with existing systems and support seamless integration.
- Utilized **Agile** Methodology throughout the project lifecycle
- Utilized **JIRA**, For Progress Tracking, Bug Tracking and Project related progress.

EDUCATIONAL DETAILS:

Bachelor Of Computer Application   July 2019-March 2022
Shivaji University Kolhapur
88.64%

DECLARATION:

      I am self assured of my ability to work in a team with commitment and declaration. I hereby declare that the above Information furnished is true to the best of my knowledge and belief.
