SKILLS

Programming Languages:

- JavaScript
- TypeScript

Web Technology:

- HTML5 • CSS3

Tools:

- Git • GitHub • NPM

Framework/Library

- React.js
- Next.js
- Vue.js
- Angular
- Redux • RTK • RTK Query • React Query • Zod • React Hook Form • formik
- react-table • lodash • moment.js • Shadcn UI • NextAuth • reCaptcha • MailChimp • OAuth

CSS Framework

- Bootstrap • Material UI • Tailwind • Styled Components • Responsive design

CSS Preprocessor

- SASS(SCSS)

Backend:

- Node.js • MongoDB • Express
- JWT • NestJS • Stripe • RESTful APIs
- NodeMailer

OTHERS

- Playing Cricket
- Learn About Programming

EXPERIENCE

ZONVOIR TECHNOLOGIES PVT LTD | FULL-STACK DEVELOPER

Dec 2020 - Present | Lucknow, UP

PROJECTS

TOWN PORTAL | REACT.JS | NEXT.JS | MONGODB | NODE.JS

- Developed a high-performance and responsive platform for businesses, government information, real estate, and social interaction to share local information and problems.
- Implemented **debouncing** for dynamic search and **Stripe** for **secure payments**. Front-End:<https://masonone.us/>
- Optimised the **RESTful APIs** using react-query and optimise the code to improve performance Admin:<https://admin.masonone.us/>

FEATHER | REACT.JS | TAILWIND | REDUX | NODEJS | MONGODB | NEXT.JS

- Feather is an E-commerce web app. It is a monthly subscription service for your home that lets you easily get the furniture (and decor!) you need, for the amount of time you need it.
- Implemented **Infinite scroll** and **lazy loading** with **suspense**
Link:<https://livefeather.com/>

FATLLAMA | REACT.JS | REDUX | STYLED-COMPONENTS | API | NEXT.JS

- A platform enabling locals to rent diverse items for home tasks, recreation, or professional needs, fostering community connections.
- Implemented **state management** using **redux** and optimise the **RESTful APIs** using RTK query. Link: <https://fatllama.com/>

ZONVOIR | REACTJS | MONGODB | NODE.JS

- A portfolio website is a personalized showcase of one's work, skills, products, achievements, and experiences.
- Link: <https://zonvoir.com>

FUNNEL BUILDER | REACTJS | REDUX | REACT FLOW

- To boost the sale and average order value through order bumps and one-click upsells.
- Implemented **drag-n-drop** based **flow-chart**

HOUSE BUYERS | ANGULAR | BOOTSTRAP | GOOGLE MAP

- It is a platform where individuals can buy and sell homes at affordable prices, empowering communities to achieve their housing goals.
- Implemented **REST API** and **Lazy loading**
Link: <https://www.housebuyersofamerica.com/>

MYORX | VUEJS | PINIA | API

- It is an online health care consultation in the form of a questionnaire, which the doctor will review and medication will be delivered to the customer.
- It was an Admin Panel that managed the user, products, orders, and doctors and also can book a consultation.
