## PROFESSIONAL SUMMARY

---

A skilled and detail-oriented Flutter Developer with over 1 years of experience in building and maintaining cross-platform mobile applications for both Android and iOS. Proficient in Dart and Flutter's tools, with a strong understanding of modern design principles, state management, and responsive layouts. Demonstrated expertise in integrating Firebase Authentication, Hive databases, and APIs, coupled with a keen eye for UI/UX design. Committed to continuous learning and improvement, with a focus on enhancing code quality through best practices, testing, and version control.

## WORK EXPERIENCE

---

Software Engineer | Vide Alpha Tech Services Pvt. Ltd. Delhi | Oct 2023 – Present

- I have been working as a **Software Engineer at Vide Alpha Tech** in Delhi from past 1 Year.
- Developed and improved apps for a business platform, focusing on both front-end and back-end to ensure fast performance and smooth user experience.
- Delivered clean, reusable code while adhering to project deadlines and quality requirements.

Android Developer Intern | Techpile technology Private Limited|

- I have completed my 3 months **Internship** at Techpile technology Private Limited in Lucknow.
- Assisted in developing the front-end using **Android**, ensuring seamless navigation and a clean UI.

Languages: Dart (Proficient), OOPS  
Version Control: Git, GitHub  
Tools (IDE): Android Studio, Visual Studio Code  
Other Skills: Responsive Design, Team Collaboration, Debugging, Code Reviews, Time Management

## PROJECTS

---

VideTrader App| Flutter, Dart, REST API, GitHub

- Developed a mobile application named **VideAlpha Trader App**, designed to connect buyers and sellers for efficient trading. The app allows users to browse and list items, track transactions, and manage payments, providing a seamless and secure trading experience.
- This app includes features like product listing, buyer-seller matching, price negotiation, and secure payment integration.
- Integrated Home Screen, Search Functionality, Filters for product categories, and Push Notifications using Firebase.

ChatApp(Admin Panel) | Flutter, Dart, RESTful API, GitHub

- Developed a mobile application named **ChatApp**, designed to connect users through efficient and real-time messaging. The app allows users to send messages, manage conversations, and integrate multimedia, providing a seamless and engaging communication experience.
- The app includes features like user status updates, typing indicators, and message encryption for secure and smooth communication.
- Worked on Firebase Authentication, integrated the Hive database for local storage, API integration for seamless backend communication, and designed the overall app interface.
