ABHISHEKH KUMAR YADAV

Software Engineer | **3avu.yd@gmail.com** | **+91-9473570904** | **LinkedIn** | **Github** | **Leetcode**

SKILLS

- **FRONT END DEVELOPMENT-** ReactJS, Redux, JavaScript, Angular, HTML, CSS.
- **BACK END DEVELOPMENT-** Express, NodeJS, Java.
- **LIBRARIES-** Ant Design, React Flow, React Query, Zustand, Apache Charts, JWT, Bcrypt.
- **MISCELLANEOUS-** MongoDB | Redis | AWS-S3 | MySQL | Linux
- **TOOLS-** Git, GitHub, Figma, VS Code, IntelliJ Idea, Postman, ClickUp.

EXPERIENCE

Hyperion Technologies (KycHub) | **JavaScript, React, Angular.**

Jr. Front End Developer | Feb 2023 – Present, London, UK(Remote)

Roles and Responsibilities:

- **Implemented** user interface using **ReactJS** or **Angular** and continuously **refined** and **optimized** the user experience by adding **little touches, responsive layouts**, and **engaging interactions**.
- Proactively **identify** and **troubleshoot** software **glitches** and user experience **bottlenecks**, conducting **thorough usability tests** to ensure **smooth functionality**.
- Play a **pivotal role** in the **evolution** of **OPSFLOW** by actively **contributing** to its **development**, particularly in **researching, developing,** and **integrating** front-end **functionalities**.
- Collaborated closely with the **development team** throughout the project **lifecycle**, from **inception** to **deployment**, providing **valuable insights** and support to ensure **successful implementation**.

Opsflow   *Domain: Banking and Multinational Financial Services*

Project Description: The platform employs **AI-driven, no-code solutions** to streamline **risk** and **compliance**, for providing **Know Your Business (KYB)** services to enhance **due diligence** processes.

Customize **workflows** effortlessly, minimizing setup time. Improve **KYC operations** to reduce **fraud, costs,** and **IT workload**. Easily adapt to **regulatory changes** and **business growth**. Collaborate seamlessly, configure **interfaces**, integrate **APIs**, and **deploy** rapidly. Simplify **financial crime management** and access advanced **risk assessment**. Utilize a **user-friendly form builder** and scalable **multi-user support**. Ensure efficient **compliance** with easy **reporting** and **case management**.

Technologies & Libraries Used: **ReactJS**, Redux, **React Flow**, **Ant Design**, BPMN, Spring Boot

Customer Risk Assessment   *Domain: Banking and Multinational Financial Services*

Project Description: The applications offer **KYC services** facilitating **end-to-end customer onboarding and screening**. Provides **automated** tools and insights to compliance teams, **aiding** in **fraud prevention**. Reduces **false positives**, customer **friction**, and manual work.

Technologies & Libraries Used: **ReactJS**, Ant Design, **React Query**, **Zustand**, **React Grid Layout**, **Immer**, Spring Boot.

Centralized Dashboard   *Domain: Banking and Multinational Financial Services*

Project Description: It **unified Opsflow, CRA,** and **Transaction Monitoring** via **Single Sign-On**.

Merged customer data into a **single, intuitive table**. Empowers users with comprehensive insights. Eliminates the need for **toggling** between systems. Provides a **holistic view** of metrics and trends.

Technologies & Libraries Used: **Angular**, Spring Boot.

EDUCATION

- Bachelor of Technology in Electronics and Communication Engineering   *2017-2021*
  Bundelkhand University, Jhansi, India   *CGPA 7.77/10*
