## WORK EXPERIENCE

### Flutter Developer

#### Vexil Infotech Private Limited

07/2023 - Present

Lucknow, India

##### Tasks

- Developed and maintained cross-platform mobile applications using Flutter, ensuring a consistent and high-quality user experience.
- Ability to efficiently manage the app's state, making it scalable and maintainable with state management in Flutter.
- Integrated third-party APIs and libraries to enhance application functionality and user interactions.
- Experience with integrating payment gateways and Google maps into Flutter applications.

### Associate Software Developer

#### IPH Technologies Pvt Ltd

03/2022 - 06/2023

lucknow

##### Tasks

- Developed and maintained robust, responsive, and user-friendly mobile applications using Flutter framework.
- Implemented custom widgets, animations, and user interfaces to enhance the overall app experience.
- Integrated RESTful APIs and third-party libraries for seamless data exchange and feature enrichment.
- Ability to efficiently manage the app's state, making it scalable and maintainable with state management in Flutter.

## EDUCATION

### Master of Computer Application

#### Shri RamSwaroop Memorial University

07/2020 - 06/2022

Lucknow

##### Project

- IOT Based Automatic Accident Detection

### Bachelor in Science

#### Chhatrapati Shahu Ji Maharaj University

09/2017 - 08/2020

Kanpur

## TECHNICAL SKILLS

Firebase

Git

Api

Flutter Android

Flutter IOS

Dart(mid-range)

## PROJECTS

### SaleBuyRent

Developed a feature-rich Ecommerce app using Flutter for iOS platforms. Integrated Google Maps for location-based services, providing users with personalized experiences. Implemented secure payment gateways for seamless and secure transactions. Designed and developed user authentication, product listings, shopping cart, order management, and notification features. Utilized Provider state management for efficient state handling and responsiveness

### BasEkCall

Designed and developed a cross-platform eCommerce application for iOS and Android using Flutter, ensuring a consistent and efficient user experience across both platforms. Integrated Google Maps API to provide location-based services, enhancing the app's usability for users seeking geographically relevant information. Implemented secure payment gateways to facilitate seamless and protected transactions, ensuring a secure financial environment for users. Established robust User Authentication mechanisms to safeguard user data and enhance the overall security of the application. Developed and maintained P Utilized provider state management to efficiently manage the state of the application, ensuring seamless data flow and responsiveness product Listings functionality, optimizing product display and enhancing user navigation within the app. Implemented Shopping Cart and Order Management features to streamline the shopping process and improve user convenience. Empowered vendors to add and manage their products through a user-friendly interface, contributing to the app's diverse product catalog.

### Employee Management System

Designed and implemented a comprehensive Employee Management System using Flutter, providing HR administrators with an intuitive interface for efficient employee profile management. Designing for managing personal details, attendance records, performance evaluations, time management, company details, and company events within the application. Integrated Rest API's to facilitate the storage and retrieval of employee data, ensuring real-time updates and seamless synchronization across multiple devices. Implemented a dynamic theme changing feature based on light and dark mode preferences, enhancing user experience and accessibility. Incorporated an image and file picker for updating employee images, improving the system's flexibility and user-friendly interaction. Implemented download functionality for files and PDF documents, enhancing document management capabilities within the Employee Management System. Integrated a calendar feature for tracking holidays and company events, providing HR administrators with a visual overview and aiding in efficient workforce management. Implemented a snack bar within the system to provide timely notifications and alerts, improving the overall user experience and facilitating quick communication. Utilized Riverpod state management for efficient state handling and responsiveness.

### Speakeasy Live

Developed visually appealing user interfaces (UI) using the Flutter framework and Dart programming language. Created UI components and layouts based on design specifications, ensuring consistency and adherence to industry best practices. Implemented responsive and interactive UI elements, providing an intuitive user experience across various screen sizes and orientations. Integrated RESTful APIs seamlessly into the Flutter application to fetch and display dynamic data, enhancing the overall functionality of the user interface.
