## PROJECTS

- Project OneAI (oneaichat.com)
- Role: MERN Developer
- Description: As a MERN developer, I played a pivotal role in the successful development and deployment of Project OneAI, a live web application. My responsibilities included:
- Designing and implementing the front-end using React, ensuring an engaging and user-friendly interface.
- Developing the back-end using Node.js and Express.js, creating RESTful APIs for seamless data retrieval and manipulation.
- Integrating MongoDB to handle the application's database needs and optimizing database queries for performance.
- Debugging and troubleshooting issues, enhancing the application's functionality, and ensuring it met all requirements.
- Collaborating closely with the project manager and the development team to meet project milestones and ensure code quality.
