Shivajinagar, Jhansi, India
LinkedIn: [mohit-kumar-saroj](#) | Github: [dev-mohitkumarsaroj](#) | Leetcode: [LeetCode_Profile](#)

## EDUCATIONAL QUALIFICATIONS

B.Tech (Computer Science and Engineering)                               2020-24
Bundelkhand University, Jhansi                                          7.96 CGPA

## PROFESSIONAL EXPERIENCE

**Multigrad (Fightage Pvt. Ltd.)**

**Full Stack Developer Intern**                                **July 2023 – Nov 2023**

Spearheaded the end-to-end development of an innovative HR portal using React JS, resulting in a 30% increase in employee engagement and productivity. Designed and crafted a website for internship applications, selections, and task assignments, all powered by ReactJS.

**Virtual Internship by Cognizant with Forage**                        **July 2020**

Engaged in a dynamic virtual internship with Cognizant through Forage, applying agile development methodologies to real-world projects, fostering collaborative problem-solving, and gaining invaluable hands-on experience in agile project management.

## SKILLS

**Frontend:** HTML5, CSS3
**Backend:** JavaScript
**Frameworks:** Bootstrap, React JS, NodeJS , ExpressJS, TailwindCSS
**Databases:** MongoDB
**Tools:** Git, GitHub, Visual Studio Code, Figma
**Programming Languages:** C, C++

## PROJECTS

**Ecommerce App**                                          **September 2023-May 2024**

• Designed and implemented a responsive and user-friendly frontend interface using ReactJS in this eCommerce website, enhancing user engagement and driving seamless navigation.                                              [LINK](#)
• Developed the backend using Node.js and Express.js to handle server-side logic, RESTful APIs, and database integration with MongoDB. Implemented user authentication and authorization using JWT (JSON Web Tokens) for enhanced security.

**Crisis Collab (Major Project)**

Smart India Hackathon 2023 - Ministry of Home Affairs              **October 2023- May 2024**
• Member of a six-member team participating in the Smart India Hackathon 2023, addressing the critical challenge of creating a platform to register and coordinate rescue agencies during crises.
• Designing and developing the "Crisis Collab Website" with a focus on Web development using React and Flutter.
• Led the integration of the Google Maps API to display the real-time location of rescue agencies during calamities.
• Drove the backend development using Firebase, enabling data management, user authentication, and data storage for the app.                                                              [LINK](#)

**Portfolio website**

• Crafted a visually stunning and interactive portfolio website utilizing ReactJS, showcasing my skills, projects, and professional accomplishments in a dynamic and engaging manner.
