## SKILLS

### Power Bi

Intermediate

### Tableau

Intermediate

### Data Science

Intermediate

### Python

### Data Analysis

Intermediate

Proficient in data analysis techniques, including data mining, data cleaning, data modeling, and statistical analysis. Skilled in utilizing programming languages such as Python and SQL for data manipulation and analysis.

### Data Management

Intermediate

Experienced in managing and maintaining master data, ensuring data accuracy, consistency, and adherence to data standards. Proficient in handling data integration, data quality assurance, and data governance.

### Reporting and Visualization

Intermediate

Expertise in designing and developing reports, dashboards, and visualizations to effectively communicate insights and trends. Proficient in using tools such as Tableau, Power BI, and Excel for data visualization and reporting.

### Database Management

Intermediate

Skilled in working with relational databases, querying data using SQL, and optimizing database performance. Familiarity with database systems such as MySQL and Microsoft SQL Server.

### Statistical Analysis

Intermediate

Strong foundation in statistical concepts and techniques, including hypothesis testing, regression analysis, and predictive modeling. Proficient in using statistical software such as SPSS or SAS for advanced data analysis.

### Problem-solving and Critical Thinking

Intermediate

Demonstrated ability to analyze complex business problems, identify patterns, and derive meaningful insights from data. Strong critical thinking skills to assess data integrity, identify data quality issues, and propose solutions.

## AWARDS

Received Employee of the month award in the year 2023.

Received spot award in the year 2022.

Appreciated by managers for preparing the analysis report on time.

Actively participated in multiple csm events as a member of csm team.

Highly skilled and detail-oriented overall with 8 years and 4 months of experience and currently working as a Shift Lead data analyst with 3 years and 5 months of experience in managing and analyzing complex datasets. I am seeking a challenging position to leverage my data management, reporting, and data-driven decision-making expertise. Developed ETL processes to extract, transform, and load data from various sources into Power BI and Tableau.

## WORK EXPERIENCE

### M/s. Verificent Technologies, Pune

(April 01, 2020 - Present)

Shift Lead Data Analyst

- Conducted data analysis to support business decision-making processes, including data extraction, cleaning, transformation, and validation.
- Developed and maintained reports, dashboards, and data visualizations using tools such as Tableau, providing stakeholders with actionable insights and KPI tracking.
- Collaborated with cross-functional teams to identify business requirements, design data models, and implement data-driven solutions.
- Managed and maintained master data records, ensuring data accuracy, consistency, and compliance with data standards.
- Assisted in the development and implementation of data quality-assurance processes, conducting data profiling, validation, and addressing data quality issues.
- Provided technical expertise in database management, including SQL query optimization, performance tuning, and database administration.
- Conducted statistical analysis and modeling to identify trends, patterns, and correlations in the data, contributing to strategic decision-making.
- Trained end-users on data analysis tools, reports, and dashboards, promoting data literacy and self-service analytics.
- Actively contributed to process improvement initiatives by optimizing data management practices and enhancing data integrity.

### M/s. Technical & Vocational Technology, Nagpur

(May 01, 2015 - March 31, 2020)

Business Analyst

- Conducted market research to identify selling possibilities and evaluate customer needs.
- Actively seeking out new sales opportunities through calling, networking, and social media.
- Setting up meetings with potential clients and listening to their wishes and concerns.
- Conduct market research to identify selling possibilities and evaluate customer needs.
- Actively seek out new sales opportunities through cold calling, networking, and social media.
- Prepare and deliver appropriate presentations on products and services.
- Create frequent reviews and reports with sales and financial data.
- Ensure the availability of stock for sales and demonstrations.
- Participate on behalf of the company in exhibitions or conferences.
- Negotiate/close deals and handle complaints or objections.
- Collaborate with team members to achieve better results.
- Gather feedback from customers or prospects and share it with internal teams.

## EDUCATION

### Dr. C. V. Raman University, Bilaspur (C.G.)

MBA , HR & IT

### R.T.M. Nagpur University

BBA, Marketing management

## PROJECTS

### TechnoEdge Sales Analysis

- Collecting sales data from various sources (e.g. CRM systems, spreadsheets, databases).
- Cleaning and organizing the data to ensure data accuracy and consistency.
- Analyzing sales trends, patterns, and performance metrics to identify opportunities for growth and improvement.
- Creating visualizations (charts, graphs) to present the findings to stakeholders.
- Collaborating with sales teams to understand their requirements and providing actionable insights.

### Proctortrack and Remotedesk

- Collecting operational data from different departments (e.g. ml, support and live team departments).
- Collaborating with ml team to implement improvements and measure their impact.
- Conducting data analysis to identify inefficiencies and bottlenecks in the ml'ng process.
- Communicating findings and insights to stakeholders, highlighting the most effective variations.
- Creating dashboards and reports to monitor ongoing performance and suggest further enhancements.
- Responsible for monitoring the ticket queues manually.
- Active participation in daily status calls.
