React.js, Node.js / Express.js, MongoDB, HTML/CSS, JavaScript, Redux, CSS, API Development, DBMS, MySQL, Next.js, Tailwind CSS, SDLC

Work Experience

MERN stack developer

Third Essential IT Solution – April 2023 – Present

- Leveraged the power of React's component-based architecture to create reusable UI components, resulting in efficient development and consistent design.
- Utilized Tailwind CSS to design and style components, adhering to modern design standards and promoting a visually appealing user interface.
- Implemented state management solutions, including React Hooks and Context API, to manage complex application states and interactions effectively.
- Led development on a dynamic real estate platform using Next.js.
- Leveraged Firebase authentication and real-time database.
- Successfully integrated Redux, a state management library, into the application architecture.
- Integrated Google APIs, including Google Maps, to provide interactive property location visualization and accurate geolocation services.
- Designed and implemented responsive UI/UX components.
- Designed, developed, and maintained APIs that [specific achievement, e.g., facilitated seamless data retrieval and updates].
- Spearheaded the end-to-end development of a comprehensive gym application.

MERN Stack Developer

Sipnotech Solutions – July 2022 – April 2023

- Developed user-facing features using React.js by translating designs and wireframes into high-quality code.
- Developed reusable components for future use and Integrated backend services
- Optimised components for maximum performance across a vast array of web-capable devices and browsers
- Developed and managed backend services/API using nodeJS
- Designed a database for storing data sent from the front end via REST APIs
- Collaborated and coordinated with cross-functional teams including product and design, working on distinct layers of product development
- Provided technical input to the planning, design, and requirements gathering process for a new product/project features
- Contributed best-practices and architectural guidance to our front-end applications
- Involved from conception to completion of projects/products.
- Worked on custom requirement projects like ecommerce application, Grocery application, News application, etc.
