- Built responsive and maintainable designs for optimal user experiences.
- Specialized in crafting cohesive web solutions by React.js,Redux and Rest Api and Node.js technologies.
- My role involves collaborating with cross-functional teams to implement designs, optimize user experience, and ensure the highest standard of performance across various platforms

PROFESSIONAL PROJECTS

CRB -Car Repair Billing

- Billing Repair Card (BRC) is a component of Car Repair Billing that enables repair shops and short line and regional railroads to use an interface to report repairs, automatically price repairs against the Car Repair Billing Price Master, and send the repair data directly into Railinc's Car Repair Billing Data Exchange. BRC is designed to support more efficient business exchanges among railcar owners, freight car repair companies, and railroads. Repair shops and short line and regional railroads are able to accurately price their repairs and create invoices with BRC. Car owners benefit from the Car Repair Billing Price Master, more accurate price matrices, and data exchanges that help eliminate paper invoices.
