Here, I am working in the airline domain. We are making different types of software products and providing business solutions. Here, I am working as a front-end React.js developer.Developed React applications using Redux state management and integrating RESTful APIs.Created, debugged, and resolved custom components, forms, and interfaces for user interactions in React. And integrated third-party libraries into existing React applications. Also, built reusable UI components that can be used across multiple projects with React.

I was part of a lot of demos, more than 9. In those demos, I learned a lot of things like how business logic works, how to handle that type of development which has short deadlines, and new tech, etc.
