ABOUT ME

I am a passionate Full Stack Laravel Developer who enjoys building dynamic and user-friendly websites. I have experience with PHP, Laravel, CodeIgniter, MySQL, HTML, CSS, and jQuery. I focus on creating fast, secure, and scalable web applications. I'm always learning new technologies to deliver high-quality solutions and improve user experience.

PROFESSIONAL EXPERIENCE

Trisha Web Soft   Oct 2023 - Present

Junior Full Stack PHP Developer (Laravel & CodeIgniter)

I'm a Junior PHP Web Developer with real hands-on experience building dynamic websites using Laravel and CodeIgniter. I work well with both back-end and front-end technologies. On the front end, I use HTML, CSS, and JavaScript to create responsive, user-friendly designs. I'm comfortable integrating APIs and testing them with Postman, and I know how to write efficient database queries to keep websites fast and scalable. I also use Git for version control and follow best coding practices to write clean, maintainable code.
For design work, I use tools like Figma to turn ideas into real user interfaces.
Lastly, I enjoy solving problems, working with teams, and learning new things to improve how I work.

PROJECTS

Ubuddy CRM – School Visit CRM (Customer Relationship Management System)
Role: Full Stack Laravel Developer
Technologies: Laravel ,PHP, JavaScript, HTML, CSS, MySQL ,Bootstrap 5
Project Overview:
I developed a custom CRM system specifically designed for managing school visit activities and lead follow-ups. The process starts when a CRM executive visits a school for an enquiry—they first add the school to the system, then log the point of contact (POC) details, and record the visit. Each visit entry also captures the live location using latitude and longitude for accurate tracking. CRM users can view all their past visits, search for schools, and edit school information when needed. On the admin side, a secure role-based authentication system allows admins to monitor all CRM activity in real time, filter data, and approve or reject visit requests submitted by the CRMs. I also set up admin seeder data for authentication during initial setup. The platform is built with a responsive front end using HTML, CSS, JavaScript, and Bootstrap 5, and the backend is powered by MySQL to ensure smooth and real-time operations in the field.

Ubuddy – School Management System
Role: Full Stack Laravel Developer
Technologies: Laravel, PHP, JavaScript, HTML, CSS, MySQL, Bootstrap 5
Project Overview:
Ubuddy is an ongoing school management system built with Laravel, PHP, and MySQL. So far, the project includes a secure, multi-authentication system with role-based access for administrators, teachers, students, and parents. The front end is designed to be responsive and user-friendly, using HTML, CSS, JavaScript, and Bootstrap 5 to ensure accessibility across devices. While the multi-authentication and UI components are complete, we're currently working on additional features like student enrollment, class scheduling, attendance tracking, exam results management, and reporting tools to enhance communication and streamline school operations.

Xoblack – Twitter Clone (Social Networking Platform)
Role: Full Stack Developer
Technologies: Laravel, PHP , JavaScript, HTML, CSS, MySQL, Bootstrap 5
Project Overview:
Developed a responsive social networking platform using Laravel, PHP, and MySQL, replicating core Twitter functionalities. The platform features user authentication, dynamic timelines for posting and interacting with tweets, a robust follow/unfollow system for personalized content feeds, and real-time messaging for communication. Ensured responsive frontend design with HTML, CSS, JavaScript, and Bootstrap 5, providing a consistent user experience across devices. Optimized MySQL database management for efficient data handling.

SKILL

Frontend Development :-
    Languages: HTML5, CSS3, JavaScript
    Frameworks/Libraries: Bootstrap,Jquery
    Other: Responsive Web Design, Version Control (GitHub, GitLab), Figma

Backend Development :-
    Languages: PHP
    Frameworks: CodeIgniter, Laravel
    Version Control: Git

EDUCATION & CERTIFICATIONS

Bachelor of Engineering
Malwa Institute of Technology
April 2014 to June 2018

Full Stack PHP Web Development Training
Projection Institute
Oct 2022 to March 2023

PHP Internship
Soham Web Solution
April 2023 to Sep 2023

EXTRACURRICULAR ACTIVITIES

- Participated in inter collage state levelBoxing championship.
- Volleyball tournament at district level.

LANGUAGE

- English
- Hindi
