Summary

- Detail-oriented and proactive software developer with a Bachelor's degree and extensive experience in building dynamic web applications using the MERN stack. Proficient in JavaScript, Node.js, Express, React, and various databases including MongoDB and PostgreSQL. Demonstrated ability to develop full-featured applications using MVC architecture, manage user authentication, and integrate third-party APIs. Strong problem-solving skills, effective communicator, and collaborative team player with a passion for continuous learning and adapting to new technologies.

Education

Mahatma Gandhi University   May 2020 – May 2023
Bachelor of Arts in English Literature   *Thodupuzha, Kerala*

Projects

E-Commerce Website | *Node.js, Express.js, MongoDB, EJS*   **January 2024**
- Developed a full-featured e-commerce platform using JavaScript, Node.js, and Express.
- Implemented user authentication features, including sign-up, login, forgot password, and OTP verification using Nodemailer.
- Created a comprehensive user account management system, including address management, password changes, order history, and referral system with wallet credits.
- Integrated coupon application, multiple payment options (Cash on Delivery, Wallet, Online), and Razorpay as the payment gateway.
- Designed an admin dashboard with user, order, and product/category analytics, using Chart.js for data visualization.
- Implemented CRUD operations for managing categories, products, and coupons, with image management using Multer and CropperJS.
- Developed sales report management with date filters, generating Excel reports using ExcelJS.
- Hosted on AWS.
- **GitHub Repository:** https://github.com/Harisankar705/G-HUB

Netflix Clone | *React, TMDB API*   **July 2024**
- Developed a Netflix-like user interface using React, replicating the design and functionality of the original platform.
- Integrated The Movie Database (TMDB) API to fetch and display movie data dynamically.
- Implemented functionality to view movie trailers directly within the app.

User Management System | *React, Redux, Node.js, Express, MongoDB*   **September 2024**
- Designed and implemented a user management application using React and Redux for state management.
- Developed user authentication features, including signup and login, with Node.js and Express.
- Utilized MongoDB for database management to store and manage user data.
- Created an admin panel allowing administrators to perform CRUD operations on user accounts.
- Implemented responsive UI design for enhanced user experience.

OLX Clone | *React, Firebase*   **July 2024**
- Developed an OLX-like user interface using React, replicating the design and functionality of the original platform.
- Utilized Firebase for database management, allowing users to add and manage products.

Technical Skills

Languages: JavaScript,Typescript C, HTML/CSS, Node.js, Express, PostgreSQL, MongoDB
Developer Tools: VS Code, GitHub
Technologies/Frameworks: React,Redux
Architectures: MVC (Model-View-Controller), OOP (Object-Oriented Programming)

Soft Skills

Communication: Effective verbal and written communication
Teamwork: Collaborative team player with strong interpersonal skills
Problem-Solving: Analytical thinker with a solution-oriented approach
Time Management: Ability to prioritize tasks and meet deadlines
Adaptability: Quick learner, adaptable to new technologies and environments
Leadership: Experience in leading projects and mentoring peers
