## WORK EXPERIENCE

### Consultant Magic EdTech Pvt Ltd.

04/2021 - Present

Noida, India

#### Tasks

- Developed a content-rich website in Vue.Js using the Composition API for the Discovery Ed Project.
- Developed a dynamic and interactive single-page application (SPA) using Vue.js and React.js, resulting in a 40% increase in user engagement.
- Experience working on Bellxcel Project in which I have done coding and problem-solving to achieve set goals in a given time frame.
- Experience in making common components for complex features.
- Developed a responsive and user-friendly website that increased user engagement by 40%.

## PROJECTS

### Key Logger

- Create a Key Logger in C++. In this project, the keystrokes of the keyboard are store in notepad. The Key Logger is generally used to capture the id and password of someone.

### Java De-Compiler

- A java De-compiler is a special type of de compiler which take class file as an input and process Java Source code as output. The de-compilation is exactly the reverse process of compilation.
