| **Summary** | Dynamic and results-driven Team Leader and Senior Mobile Application Developer with over 8 years of experience, including 2 years of leadership experience and extensive background in Android development. Expertise in Kotlin, Java, and Flutter, with a proven ability to lead teams, architect, develop, and deploy Android applications from inception to completion. Progressed from Junior to Senior Developer, showcasing a strong track record in product design and development, delivering high-quality, user-centric mobile solutions. Skilled in mentoring junior developers, fostering a collaborative and innovative environment, and aligning technology initiatives with business goals. Focused on optimizing app performance and security across all projects. |

Skills	
Languages :	Kotlin, Java, Flutter, Dart
Frontend :	XML, JetPack Compose,
Frameworks/Libraries:	Android Studio, IntellijIdea,
Dependency Injection :	Hilt, Dagger2
Network Libraries :	RxJava, Volley, Retrofit
Architecture :	MVVM, MVP, MVC, Bloc
Testing tools :	JUnit, Espresso, Mockito
Real-Time Communication :	Agora
Search Tools:	ChatGPT, Google
Cloud Native Technologies:	Kubernetes, Docker
Databases :	SQlite, Room DB, MySQL
Project Management & Communication :	Slack, JIRA
Design Tools :	Adobe Photoshop
OS:	Mac, Windows, Ubuntu
Blockchain Libraries:	Web3j, BitcoinJ
Crypto Wallet Development:	Secure Key Management, Seed Phrases
API Integrations:	Infura, CoinGecko, Etherscan
Multithreading and Asynchronous Programming :	Proficient in AsyncTask, Handlers, Coroutines, LiveData
Performance Optimization :	Skilled in memory management and battery usage optimization.
App Deployment :	Experienced in Google Play Store deployments and updates.
Version Control :	Advanced knowledge of Git and branching strategies.
Continuous Integration/ Continuous Deployment (CI/CD) :	Experience with Jenkins, Bash Script, GitHub Actions.
User Interface/ User Experience (UI/UX) :	Strong understanding of Material Design principles.
Cross-Platform Development :	Familiar with React Native.
Security Best Practices :	Knowledge of secure coding practices and app security.

Job Experience	

❖ **March 2024 – Present**   **Aye Finance Pvt. Ltd.**

  (11 months)   Sr. Android Developer

- *Business Skills Used*: Team Leader, DataBase Management, Business logics implementation
- *Technical Skills Used*: Kotlin, Jetpack Compose, RoomDB, Mvvm, Agile

❖ **July 2021 – March 2024**   **Augurs Technologies Pvt. Ltd.**

  (2 Years 8 Month)   Sr. Android Executive, Mobile Team.

- *Business Skills Used*: Product Design & Development, Product Management, Team building
- *Technical Skills Used*: Kotlin, Flutter, Jetpack Compose, Retrofit, XML, Mvvm, Agile

❖ **December 2020- July 2021**   **Troology Technologies Pvt. Ltd.**
  (8 months)   Jr. Software Engineer

- *Business Skills Used*: Product Development, Business logics.
- *Technical Skills Used*: Java, Volley, XML, Shopify, Agile

❖ **September 2019-Oct 2020**   **SRM Techsol Pvt. Ltd.**
  (1.5 years)   Jr. Software Engineer

- *Business Skills Used*: Product Development, Business logics.
- *Technical Skills Used*: Java, Agile Methodology

❖ **August 2016- August 2019**   **Endurance Classes Pvt. Ltd.**
  (3 years)   Maths Lecturer

Education	2020-22	National Rehabilitation University
		D.Ed
	2012-16	APJ Abdul Kalam Technical University
		B.Tech

Projects & Responsibilities

❖ **Loan Origination System** (AYE Finance)

LOS android application used by aye finance employees such as loan advisors, branch credit officers:
- LOS and ML team management
- Database management
- UI changed
- Git management
- Consumption callIds
- Project improvement and production handling

❖ **Afrah Beauty Application** (Augurs)

Afrah Beauty is an app of Blanc company based in Kuwait. It showcases different top designers around the world to achieve perfection in their products. The app user can order beauty products from categories, can see the price of products in different currencies and pay using stripe payment. Most of the project part was done by me which includes:

- Designing of screens.
- Implemented google and facebook logins.
- Implemented business logic.
- Consumption of rest APIs.
- Stripe payment gateway integration.
- Implemented backend, facebook and google analytics.
- Publishment to playstore.

❖ **Boat Wash App** (Augurs)

Boat Wash app is a product of Swedish company Battvatt Företag. It has the option to select the type of boat and wash center from the list. Users can buy multiple washes for their boats and show the QR code at the actual centers before the wash starts. Most of the project part was done by me which includes:

- Consumption of rest APIs for several screens.
- Designed the screens
- Integration of Google maps to show wash centers.
- Wash price calculations as per length of boat.
- Implemented stripe payment gateway.

Drive-In Boat Wash

❖ **Savvy-free savings app** (Troology)

Savvy is a money saving app of the company named Yellow sky technologies. It helps users to save up for their goals (new home, marriage, car, bike) and earn interest on savings as well. It is trusted by 30,000+ savers. In the project I have worked on sdk maintenance which includes the several tasks mentioned below:

- KYC sdk screen designs
- Aadhar card verification with text recognition and autofill
- Pan card and address verification.
- Bank account details verification and submission

Savvy- free savings app

❖ **Ordering Direct** (SRM Techsol)

Ordering Direct is a UK based company used to deliver restaurant apps to clients. Under that I have worked on multiple apps like Saffron Lounge, Abbey Hebburn, Smash Patties etc. The user can order food from extensive menu and pay for delivery or take away.I have done the major part of the project which includes:

- Designed the screens.
- Implemented google and facebook logins.
- Card details saved to the local database in a custom designed screen.
- Consumption of rest APIs.
- Logic of menu selection, adding items to cart implemented.
- Implemented stripe payment gateway.

Saffron Lounge

❖ **Pragyan UP E Library** (SRM Techsol)

UP e- library is a project of Uttar Pradesh Govt. Users can explore the vast collection of books in various genres, such as NCERT, CBSE & UP Board Books in multiple languages (Hindi, English, Urdu). Users can locate the nearest library out of the Public district libraries in the state of U.P. One can register for their e-Library Card using this Application.
Major project executed by me as part of this product included:

- Screens design development
- Rest API consumptions for book list and categories
- Pdf reader integration for book reading.
- Google map integration to view libraries
- Opened whatsapp, dialer, maps as per requirement.

Pragyan UP E Library

Personal
- Strengths : Innovative thinker, Positive attitude, Leadership and Team Player.
- Hobbies   : Online games.
