## PROJECTS

### Skoot App (A Scooter booking application)

- Riders can choose from thousands of scooters and motorbikes offered by our Trusted Rental Partners. Partners can list their scooters and motorbikes on the Skoot platform to find new customers and earn more money.
- I have Designed and Developed this application using Flutter Framework for both Android and IOS mobile Apps.
- Android App :- <https://play.google.com/store/apps/details?id=com.skoot.now>  
IOS : <https://apps.apple.com/in/app/skoot-motorbike-rental-app/id6448734971>.

### TinBuilding App (Food Application)

- Get food delivery, order take out, and make reservations at the highest quality restaurants in the Seaport District with Tin Building.
- I and my team Designed and Developed this application using Flutter Framework for both Android and IOS mobile Apps.
- Android App Link :- <https://play.google.com/store/apps/details?id=com.howardhughes.tinbuilding&hl=en-IN>.
- IOS :- <https://apps.apple.com/in/app/tin-building-food-delivery/id1581461829>.

### Kidcaboo App (A Car booking App for children)

- This app allows user to create or book a CarPool or Single Family Cabs for their children. It has two Panels (DrivingNanny App & Parent App). The Kidcaboo Driving Nanny app is your gateway to joining the Kidcaboo family and serving our wonderful family and school clients.
- I have Designed and Developed this app independently using Flutter Framework for both Android and IOS mobile Apps.
- Android :- <https://play.google.com/store/apps/details?id=com.kidcaboo.driver>  
IOS :- <https://apps.apple.com/us/app/driving-nanny/id1579044929>.

## ACHIEVEMENTS

- Hackathon winner at Company Level in Flutter in Feb 2020.
- Employee of the Month received twice in 2018.
- Completed 3 Months Training in Android in October 2016.
- 6 Months course in Java (Core + Advanced) in 2015.
- Attended Android Workshop in College for 45 days.
- Two times Chess Champion in Inter Branch Competition.
