PROFILE

Web Developer with 3+ years of experience with a proven ability to collaborate effectively with senior developers while spending extra time to be mentored. Able to thrive in fast-paced and challenging environments where accuracy and efficiency matter. Seeking a position where apply my passion for coding to a talented engineering team to develop quality solutions.

WORK EXPERIENCE

2021 – 2024

Web developer

Codomotive Software Solutions, Kolkata

Developing end user UI using React Js, JavaScript, jQuery, HTML, CSS, and JSON with cross-browser compatibility. Ensures responsiveness of application in both mobile and desktop device.

• An understanding of the fundamentals in development UI. Working knowledge of CSS frameworks like BOOTSTRAP. Create responsive web applications using bootstrap.

• Proficiency in JS including DOM manipulation and the JavaScript object model also working with JavaScript framework jQuery.

• Design and Development and Integrate various Rest API crud operations (create, Read, Update, Delete). Save user data in database management system. Also, integrating different 3rd party APIs.

• Building reasonable components and front-end libraries for future use. Troubleshoot, debug, and upgrade existing frontend apps and pages. Collaborate with user experience teams and data analyst to get feedback and improve usability and over all user experience.

PROJECTS

Kotapets - *company project*

Kotapets is a custom ecommerce platform on web, android, and iOS. Where customers can order engraved jewelry / pendent for their pets and able to track their orders. Customer can also add details of their pets and maintain a profile and request for a service for their pet to a service provider. On the other hand, a service provider will also use this app to provide services to customer.

Automobile - *company project*

Automobile is an application where a customer can hire automobile services like Dry cleaning, Foam washing, Combo service, etc. Registered Customers can add their vehicles to the app and during service requests, the customer can select the desired car from the added car list.
