Work History

Jan 2022 - Jul 2023

Senior Business Analyst

RAZORPOD, GURUGRAM

Applying scientific methods, algorithms, and tools to extract insights and knowledge from data.

- Deep Learning: Utilizing neural networks and algorithms to model and solve complex problems in machine learning.
- Mathematical Modeling: Formulating mathematical representations of real-world phenomena to analyze and make predictions.
- Mathematics: Applying mathematical principles and techniques to solve problems and make informed decisions.
- Natural Language Processing (NLP): Developing algorithms and models to understand and process human language.
- Predictive Analytics: Using historical data and statistical techniques to make predictions and forecast future outcomes.
- Predictive Modeling: Creating statistical models to predict and estimate future events or behaviors.
- Python (Programming Language): Proficient in programming with Python for data manipulation, analysis, and machine learning.
- SQL: Proficient in Structured Query Language for managing and retrieving data from relational databases.
- Statistical Modeling: Building statistical models to analyze and interpret data and make informed decisions.
- Developed and improved integrated reporting and analysis capabilities.
- Provided evaluative judgment based on analysis of information in complicated and unique situations and contributed to formulation of standards and strategies for functional areas.
- Recommended financial solutions to senior analysts based on detailed financial reporting
- Implemented code solutions to answer analytic questions and test and assess new methods.
- WORKED WITH TOOLS-ETL EXTRACT TRANSFORM AND LOAD

- DATA WARE HOUSE DESIGN ,DJANGO
- Designed compliance frameworks for multi-site data warehousing efforts to verify conformity with state and federal data security guidelines.
- Collaborated on ETL (Extract, Transform, Load) tasks, maintaining data integrity and verifying pipeline stability.
- Built databases and table structures for web applications.
- Designed and developed analytical data structures.
- Prepared documentation and analytic reports, delivering summarized results, analysis and conclusions to stakeholders.
- Generated detailed studies on potential third-party data handling solutions, verifying compliance with internal needs and stakeholder requirements.
- VISUALIZATION TOOL USED AS POWER BI AND TABLEAU
- Supported leadership team with reporting, analysis, and business presentations to inform divisional strategies.
- Grew business analysis team to support division growth and create robust team by replacing underperforming staff and recommending staff members for permanent roles.

Jan 2021 - Dec 2021

Assistant Manager/ Google Analyst
SQUARE YARDS, GURUGRAM

- Generated repeat business through exceptional customer service and responded to customer concerns with friendly and knowledgeable service.
- Completed regular inventory counts to verify stock levels, address discrepancies, and forecast future needs.
- Managed senior-level personnel working in marketing and sales capacities.
- Produced monthly reports using advanced Excel spreadsheet functions.
- Created various Excel documents to assist with pulling metrics data and presenting information to stakeholders for concise explanations of best placement for needed resources.
- Completed regular inventory counts to verify stock levels, address discrepancies, and forecast future needs
- Documented software development methodologies in technical manuals to be used by IT personnel in future projects
- Performed system analysis, documentation, testing, implementation, and user support for platform transitions
- Validated results and performed quality assurance to assess accuracy of data
- Performed budget analysis to control expenditures and predict future budget needs
- Created and managed project plans, timelines and budgets
- VISUALIZATION TOOL USED AS POWER BI AND DJANGO
- used vlookup and hlookup for data managing ms excel advance sheet

Jan 2019 - Dec 2020

Senior Business Development Executive/Business Analyst
BYJUS , NOIDA

- Party Operator), data defects and operations performance reports
- Actively working with IT & data vendor on data migration strategy

- Provided evaluative judgment based on analysis of information in complicated and unique situations and contributed to formulation of standards and strategies for functional areas.
- Developed and improved integrated reporting and analysis capabilities.
- Performed client research and identified opportunities for account growth, account penetration and market expansion
- Analyzed key aspects of business to evaluate factors driving results and summarized into presentations
- Delivered analysis of market, sales and consumer trend impact on long and short-term strategies
- used ms excel sheet for data understanding and vlookup and hlookup tools for more understanding

Oct 2017 - Dec 2018

Assistant Manager
NIRWAN UNIVERSITY, JAIPUR

- Met with students in-person and spoke over telephone to help students construct class schedules.
- Mentored low achieving students to develop plans for grade improvements.
- Developed sports activities and workshops to support new students, students on academic warning and honors students.
- Identified students in need of special attention to implement strategies for success.
- Conducted academic advisement services for students on reoccurring basis to maintain educational progression.
- used ms excel sheet for data storage and understanding it with pivot table

Education

Jun 2022 - Mar 2023

PGDM -AS BUSINESS ANALYST : Business/machine Learning
